JOHN OLIVER EASILY SETS THEM STRAIGHT

Writer in McLean's Gives Little Sidelight on British Columbia's Premier.

In an article on the recent Liberal Convention at Ottawa J. K. Munro in McLean's Magazine mentions the Premier of British Columbia, Honest John Oliver. He says:—

John is a plain man and plays his plainness for all it is worth. He uses just as many aspirates as any other orator but he uses them more carelessly. Also he waves his arms and uses his robust voice in a manner that indicates much force and energy. He looks crude, acts crude and sounds crude. But he gets there. He demonstrated this when the chairman had got into a tangle on the third ballot. Graham had withdrawn after some ballots had been marked. That had been partially straightened out when McKenzie threw up the sponge. Then a lot of people wanted to talk at once and it looked as if all the statesmanship of Gouin and Murray would never get things going right again. Suddenly Honest John jumped down from the platform.

"Hi'll explain it," he shouted. So down one side and up the other he went, his arms and voice working overtime. Laughter followed in his wake, but in less than five minutes he was back on the platform, not another question was asked, and the ballot was taken as easily and precisely as if it had been the first instead of a jumble of the third and fourth and fifth.

URGED TO VOTE IN COMING BY-ELECTION

(Special via G. T. P. Telegraphs.)
Quebec, Sept. 16.—In all the parish churches on Sunday last the congregations were urged to use their votes in the coming by-election.

In the Letter Box HUNTERS BEWARE

Editor the Daily News,
The hunting season is once more with us and the many real dangers which attend this in view I wish to appeal to all fellow hunters to exercise caution to the utmost while hunting in the bush. So many hunters (as has been proven) shoot at the first thing that moves, sometimes it is only a bush, again some fire in the direction from which they have heard a sound, thinking game to be present at that point, but as we all know this is not always true, the result being some friend or stranger is killed or badly wounded and all through carelessness on the part of the hunter, a mistake which is avoidable and almost unpardonable. So let us be sure of the object at which we shoot, thus saving suffering and sadness on the part of others and remorse for ourselves.

Thanking you, Mr. Editor, I am
(Dr.) A. H. BAYNE.

A HOPEFUL SIGN

To the editor,
A hopeful sign of the coming brotherhood of man was that witnessed the other night in a local ice cream parlor when the editorial staff of both local smart dailies were indulging in a quiet ice cream at the same table. The orchestra appropriately played the waltz "Kisses" and as the brotherly scribes left the parlor they insisted on paying for each other's refreshment. President Wilson himself could hardly have wished for more.

NAVIGABLE WATERS PROTECTION ACT.

R. S. C. Chapter 115.
The Minister of Public Works of the Government of the Province of British Columbia hereby gives notice that he has, under section 7 of the said Act, deposited with the Minister of Public Works and with the Minister of Marine and Fisheries at the office of the District Registrar of the Land Registry District at Prince Rupert, B. C., a description of the site and the plan of proposed renewal and extension of the Provincial Government Wharf at Prince Rupert, B. C., in front of Waterfront Block "F".
Take notice that after the expiration of one month from the date of the first publication of this notice the Minister of Public Works of the Government of the Province of British Columbia will, under section 7 of the said Act, apply to the Minister of Public Works and the Minister of Marine and Fisheries at their offices in the city and of Ottawa for approval of the said site and plans, and for leave to construct the said renewal and extension.
Dated at Victoria, B. C., this 21st day of August, 1919.
A. E. FOREMAN,
Public Works Engineer.
Dept. of Public Works.
Victoria, B. C.

TWO SCIENTISTS IN A TERRIFIC BATTLE

Against a background of test tubes, retorts, jars, beakers, great bowls and other chemical utensils, and in a pale bluish light that adds ghastliness to the scene, two scientists engage in a terrific battle for a beautiful girl and the formula for the highest explosive known, in "The Craving," the thrilling five-reel feature which is at the Empress Theatre tonight.
This scene is only one of scores in which the last degree of photographic excellence has been reached by motion picture producers. Positive evidence of quadruple exposure—an achievement long considered a series of illusions which show, among others, one scene of four girls being poured out of a bottle into a champagne glass, where they swim around under the very nostrils of the man holding the glass.

The story deals with two scientists who fight for mental control over each other—the one because he wants to procure a formula and the other because he wants to hold it.

SWEDES MAY NOT BE AT LABOR CONGRESS

(Special by G. T. P. Telegraphs.)
Stockholm, Sept. 16.—Hermann Lindquist asserts that the Swedish workmen will not be represented at the labor congress in Washington unless Germany and German Austria is invited to send delegates.

We sell
Frisbie Engines
Complete and ready to install.

Frisbie Motors give long, uninterrupted service with practically no repairs except occasional grinding of valves. Valves in cages; accessible in a few seconds. An "all muscle" construction throughout, every part designed for hard work. Overhead valves, opening directly into combustion chambers. No pockets or crevices to gather carbon, and waste fuel. This type of construction effects a gain of
15 to 20 per cent. more power
than is possible with L or T-Head designs. Intake and exhaust manifolds are cast integral with the cylinder; miles ahead of the old, leaky, bolted-on manifolds. Large valves insure full charge on the intake and a complete, clean exhaust.
1 to 6 CYLINDERS—5 to 75 HORSEPOWER
Frisbie Motors are made in following sizes: 1-cyl., 5 and 7 H.P.; 2-cyl., 10 and 16 H.P.; 3 cyl., 18 and 25 H.P.; 4-cyl., 30 and 40 H.P.; 6-cyl., 50 and 75 H.P.—Bore and Stroke, 4 1/4" x 6" and 6" x 6". For work or play, the Frisbie will measure up to your hardest tests.

Bake More Save More

More and more, thoughtful women are decreasing the cost of living by increasing the variety of their home baking. They have learned to bake the Dr. Price way with fewer eggs. They have found that more baked foods mean less meat. They have further discovered that their baking keeps fresh longer when made with

DR. PRICE'S CREAM BAKING POWDER

In many recipes, only half as many eggs are required, in some none at all, if an additional quantity of Dr. Price's Cream Baking Powder is used, about a teaspoonful in place of each egg omitted.
