ing capacity for at least 1000 people is desired along with the necessary dressing rooms, etc.
is to be the crucial test! The response to this plot in the house to house canvass to be carried through the assistance of the students will determine whether or not this project is forward. It cannot succeed without the support of the entire community as evidenced in the way of financial assistance.

It should be complete and it was a definite committee hopes that some families may not be in a position to pledge the full cash amount, while others can easily do much more than their share. The committee hopes that each family will attempt to make their share a minimum of \$100 cash and voluntary labor.
The committee points out the project could mean skating, figure skating, hockey, high school curling, broomball, roller skating, etc., for adults and all groups.

For a community of this size and importance the committee feels that the objective is not out of reason and could be readily reached if all will put their shoulder to the task, showing community spirit by putting the campaign over the top.
