

## Firemen's Win Protested

Firemen took their second straight victory of the semi-final playoffs last night by defeating the Hawks 5-4 in the season's best softball game. The Hawks, however, are protesting the game on the grounds that Firemen used two players from other teams while the regular member of their team sat on the bench. The protest is being decided on by the manager tomorrow.

The protest is upheld then Firemen and Hawks will play again on Wednesday night. However, the protest is rejected then the finals will start on Friday, August 27, with Rupert and Firemen in a best of three series.

Last night's game Hawks lost their first blood by scoring a

singleton in the first inning when Ken Lawry led off with a double and scored on a single by Matty Sedgwick. Hawks ran their lead to two runs in the third inning when Lawry again hit a double and scored on another single by Sedgwick.

Firemen took the lead in the top of the fourth when Tiny Carlsen was on via an error, Larry Matthews hit a long triple to left centre, Art Olsen singled but was picked off first by Letourneau, Ray Spring walked and scored when Whattam's fly ball was dropped by Rye.

The Hawks tied up the game in the bottom of the sixth. Jordy Smith struck out but Matthews lost third strike. Smith stole second, went to third on a fielder's choice and was squeezed in by Martin.

Firemen tallied twice in the top of the seventh on a single by Dallyn, a triple by Carlsen who scored when the throw from the outfield hit him and bounced into the third base stands. Hawks tried hard to get back in the game but could only get one run in their half of the seventh. Rye led off with a double and scored when Danny Bill threw the ball away at third.

The big hits for the Firemen were the triples hit by Matthews and Carlsen while Ken Lawry with two doubles and Matty Sedgwick with two singles were Hawks' leading hitters. Both Art Olsen and Tommy Sedgwick pitched good ball and received good support. Best fielding play of the game was by Jordy Smith on a long drive by Matthews in the seventh inning.

### IN BRITISH COLUMBIA

Project as planned calls for expenditure in the first stage of \$200 million; the final stage when completed will increase this to \$550 million. First stage to be completed 1954.

**KITIMAT SMELTER**  
Capacity one billion pounds of aluminum a year.

Lake, above Nechako River Dam; 500 square miles in area.

Kemano powerhouse, to be built ¼ mile inside mountain. Eventual capacity 2,000,000 h.p.

**50 YEARS AGO**  
the company's first smelter opened at Shawinigan Falls, and produced 130 tons of aluminum that year. The metal was just starting to make a market for itself.

**TODAY**  
Alcan has 4 smelters—at Arvida, Isle Maligne, Beauharnois and Shawinigan Falls—with a capacity of nearly 500,000 tons. And this light, strong, non-rusting metal has found an almost limitless range of useful jobs to do.

Jack and Charles share an estimated 30 more.

Eddy and Stan have each won the western Canada singles title twice. In 1948 they played each other for the British Columbia and western Canada titles.

Brotherly love doesn't count when the boys compete against each other. Once when Stan took the western title, Eddy came back to beat him in the B.C. event. Eddy, at the age of 15, was the only junior to win both junior and senior championships.

Their styles are vastly different. Stan, the most colorful player, has a hard forehand smash with sensational footwork. Ed has sudden backhand smashes while Art, who has a wicked serve, specializes in forehand and has a consistent defence.

# "OPERATION ALUMINUM"

Here's why a further quarter of a billion dollars is being invested by Aluminum Company of Canada in

Aluminum is being put to so many uses these days that Canada's aluminum industry, begun at Shawinigan Falls in 1900, and already grown to giant size, is embarked on another vast expansion program.

More dams, powerhouses, smelting facilities in Quebec... a whole new operation in British Columbia... these great forward strides will further step up Canada's aluminum capacity to a total of more than half a million tons a year.

**IN BRITISH COLUMBIA**

Project as planned calls for expenditure in the first stage of \$200 million; the final stage when completed will increase this to \$550 million. First stage to be completed 1954.

**IN QUEBEC**

**CHUTE-DU-DIABLE**  
250,000 h.p. installation. Begun autumn, 1950. Will be in operation May 1952.

**CHUTE-À-LA-SAVANNE**  
250,000 h.p. installation. Begun summer, 1951. To be completed in 1953.

**ISLE MALIGNE**  
Smelter. Output doubled. Construction underway.

**BEAUHARNOIS**  
Smelter. Re-opened April, 1951.

Today the names "Peribonka" and "Kitimat" mean nothing to most Canadians. Right now they head blueprints—blueprints of work in the planning stage, of work in progress with thousands of men already on the job.

"Shawinigan", "Shipshaw" and "Arvida" were new names, too, many years ago. Today they are living reminders to Canadians—and to the world—that Alcan has grown, developing this country's resources so that now it produces a quarter of the world's aluminum supply.

On the Peribonka River in Quebec, Alcan is harnessing two cataracts—Chute-du-Diable and Chute-à-la-Savanne. These will provide hydro-electric power for a big addition to aluminum output and additional power resources for the Saguenay District.

Meanwhile, up coast 400 miles from Vancouver, a whole new aluminum operation is planned. Where now stands the tiny Indian village of Kitimat, a whole new town will be built; here Alcan will construct a huge smelter. At Kemano, 50 miles away, Alcan will build a powerhouse inside a mountain; a ten-mile tunnel through this mountain will carry water from a chain of lakes down a 2,600 foot drop to develop an eventual 2,000,000 h.p. capacity.

This "Operation Aluminum" means jobs for thousands of Canadians. It means additional millions of dollars coming into this country from abroad, for much of this aluminum will be exported.

It means additional low-cost aluminum for Canada's own use—metal which a thousand plants throughout the country use to fashion everything from utensils and toys to airplanes and bridges.

"Operation Aluminum" is a big thing for Canadians and for the free democratic world. It means a further line of defence against aggression. And it means a busier, more prosperous country in which to live and work.

**50 YEARS AGO**  
the company's first smelter opened at Shawinigan Falls, and produced 130 tons of aluminum that year. The metal was just starting to make a market for itself.
