GROUNDHOG HAS POSSIBILITIES

Great Field for Enterprise in
Close Proximity to Prince
Rupert.

LINE WOULD BE
ABOUT 140 MILES

The following is the text of a
resolution moved by O. H. Nelson,
at the Board of Trade meeting
held Friday night in regard to
the Groundhog branch line of the
Grand Trunk Pacific Railway:

Whereas, the G. T. P. Railway
is passing under the control of
the people of Canada;

And whereas, it is of pressing
importance that this railroad line
should be made, at as early a date
as possible, a revenue producer
so that the people of Canada may
be relieved of any undue financial
burden, and so that the industrial
and business activity which would
be concomitant with such a con-
dition of affairs might result;

And whereas, branch lines act-
ing as "feeders" and tapping
freight producing territories are
of first importance in making
railway lines revenue producers;

Field for Enterprise.

And whereas, such a field for
enterprise exists in close prox-
imity to the main-line of the G.
T. P., namely, the Groundhog
Mountain coal fields which em-
brace an area which geologists of
the highest reputation, including
experts of the geological survey,
estimate at about seventy miles
to forty miles, in which, they re-
port, are located coal beds, the
quality of which varies from bitu-
minous coal to a high class of
anthracite not surpassed by the
best Pennsylvania products;

And whereas, this area re-
mains absolutely undeveloped
awaiting the advent of the means
of transportation, without which,
what is recognized as one of the
greatest fuel producing areas un-
der the British flag must remain
sealed;

And whereas, further, the his-
tory of industrial development has
shown that the opening up of
coal measures to economic uses
has almost invariably been fol-
lowed by the creation of other ac-
tivities for which the territory
may possess possibilities.

And whereas, within the zone
to be industrially influenced by
the coal development referred to
there are tremendous latent pos-
sibilities especially in a minin-
g line which could be safely relied
upon to develop many industrial
centers upon the opening up of
the coal to use by transport to
the existing line of the G. T. P.

National Question.

And whereas, further, the ques-
tion of fuel supplies under the
protection of the British flag has
an important bearing, at the pres-
ent time, on our national life;

And whereas, the construction
of a line of railway from the
Groundhog Mountain coal beds to
the existing line of the G. T. P.
would involve a line of from 140
miles upwards according to the
point selected as the most feasible
one for making connection;

And, whereas, such an under-
taking would bring a practically
unlimited supply of the first
quality of coal within reach of
all points along the G. T. P. and
through the terminal port of
Prince Rupert with the shipping
of the Pacific Ocean;

The Resolution.

Therefore, be it resolved, that
Board of Trade urge upon the
Government of Canada that im-
mediate steps be taken to have
an investigation made on the
ground, of the most feasible route
by which a railway line of stand-
ard gauge may be built to con-
nect the Groundhog Mountain
coal fields with the existing line
of the G. T. P.
