

The Care of the Young

Nothing brings so much comfort to Mother and Dad as the knowledge that the youngsters are growing bigger and stronger every day. Playing hard all day-sleeping soundly all night. Nestle's Evaporated Milk has brought this comfort to thousands of happy parents.

And here's the Reason! Nestlé's Evaporated Milk is just theb est of fresh cow's milk with part of the water removedthen sealed and sterilized in air-tight containers. Add wateragain and you have absolutely pure, safe milk-but more readily digestible than ordinary milk because the large fat globules of the milk have been broken up into small ones of the same size as in Mother's milk. Also, the curds which form in the stomach when Nestle's Evaporated Milk is used are soft and flaky and therefore easily digestible.

Use Nestle's Evaporated Milk for Your Baby. Use it in coffee-in cocoa-in tea. Use it in all cooking and as a beverage by diluting with one to two parts water.
