Eniov My Meals

What a pleasure it is to sit down and eat a good, hearty meal without premonition that there will be pain and discomfort in the process of digestion.

Chronic indigestion usually results from torpid liver and a consequently constipated condition of the bowels. Naturally, there are headaches and biliousness in many cases and much irritability and depressed feelings.

It is so easy to allow this condition to develop that almost before you know it you become a "dyspeptic."

But what a relief when you learn about Dr. Chase's Kidney-Liver Pills and put them to a test. In a day or two you are feeling fine and soon you realize that you have discovered the most effective regulator of the liver, kidneys and bowels.

ARIFF TRUCE BEING SOUGHT

This Is Most Interesting Objective of League of Nations Now

GENEVA, Jan. 17:-While the world has been watching momentous events in international politics -chiefly concerned with Anglo-American relations and naval questions—the League of Nations in the last quarter of 1929 has been carrying out an extensive economic pro-

Leaders of the league's economic work, pleased and hopeful because of their political brethren's apparent progress toward disarmament and security, are striving to devel-; op a spirit of economic co-operation among nations as their contribution to world peace.

Widest interest, perhaps, attaches to launching of the scheme for a "tariff truce." The league's economic committee has framed a draft treaty for the proposed customs armistice and governments of all countries have been asked to give their opinions as to the advisability of holding a diplomatic conference as a further step.

The economic committee also has arranged to convene early in 1930 a meeting of experts from all parts of the world to study agricultural industries, which are said to be generally in a poor state.

The fiscal committee has contributed a plan for eliminating double taxation, and another plan for abolishing taxation on touring automobiles in foreign countries.

A multilateral agreement for equal treatment of foreigners was devised at Paris in November by a conference under league auspices. Questions involved in this co-operative move also are largely economic.

Another league-engendered conference at Paris hopes to give effect to the treaty for abolition of import and export restrictions and prohi-

These activities are the work of the league secretariat. The international labor office, the league's institution which deals with industrial matters, also has been active.

Anxious because of the chaos in the European coal world, the labor office has summoned for January a meeting of technical experts from nine principal coal producing countries to make a reconnoitering attack on problems in this basic in-
