#### SUCCESSFUL MISSION

The mission of Mayor Orme to Victoria seems to have been a very successful one. He returns to tell us that the work on the road will be continued this summer, that the library can have the use of the building formerly occupied by the St. Andrew's Society, that the Government will next summer investigate the possibility of placing the Gov- Editor Daily News: ernment block on the market, that the necessary land for a city park will be donated to them, that park land at I would like the public and bust-Oliver Lake will be set aside as a public park under the ness men of our city to at least Parks Board, and, finally, that outstanding financial mat-know the good publicity that our ters have been settled.

The only refusal was to the request to be allowed to Mandy, is giving B. C.; especially ated on a system passed and apexport logs from Northern British Columbia.

We are particularly pleased to note a decided change in the attitude of the Government at Victoria towards Prince Rupert. This attitude will be appreciated. The policy of making a district suffer for voting against a gov. he discloses the facts about this ernment is one to be discouraged. The mission of Mayor Orme is probably the most successful in the history of the mising discovered since Granty city. We compliment him on it and also compliment the Provincial Government on their timely change of attitude.

#### PRINCE RUPERT THE PLACE

Reports from outside places indicate that there are few cities in Canada where conditions equal those obtain- pert is, the closest and most logiing in Prince Rupert today. During the winter there has been very little unemployment. In fact every man who whole of the Taku area. Now, Mr. has been willing to work has had a chance. Some have not Editor, as we are geographically accepted and others have wanted to pick and choose their so well situated, the merchants pational transcoccanic airdrens in F. H. jobs, but this is hardly a time for picking and choosing.

As a matter of fact, Prince Rupert's condition is excel-supply. We also have the opporlent. If collections are a little slow they are not as slow as at some other places. While we did not show that pro- dream of this whole country. gress we should have liked when other places were moving | Should we allow two American forward, we are not feeling the backwash now that there is a slight easing up in the national prosperity.

# Full Speed Ahead Soon

Many people do not realize that the Northern Power Company, a subsidiary of the Power Corporation of Canada, is really constructing a large hydro-electric plant to serve the city of Prince Rupert and adjoining territory. The site for the plant is being prepared and the right-of-way for the high-power lines connecting Big Falls on the Ecstall River with the city is being cleared and that during September next it is expected to turn on the power from the first unit.

What does this mean to Prince Rupert? It means that the largest power corporation of Canada has faith in the future of the city and district and already sees a market for its product.

Under the impetus of the new movement, Prince Rupert will grow. Industries will be developed and all will feel the benefit.

Prince Rupert people must prepare for the change. New buildings will be necessary. If there are no vacant houses in the city today, what will be the condition when people begin to come in?

The Daily News is alive to the situation and is laying its plans. Others must do the same if they are to keep pace with the new Prince Rupert.

### Smothering Spells TRADING Couldn't Walk Far Gasped For Breath

Mrs. T. W. Roth, Kelowna, B.C., writes: - "For over a year I was troubled with smothering spells, and it was impossible for me to walk, even a short distance, on account of having to gasp for breath.

which I did, and in a short time felt much better. "I can now recommend them to
