Wet Weather Has Made It Difficult to Continue Northern Search Today—Two Planes Still Held at Smithers

Should Flight Lieutenant Phinney and Flying Officer Dunlap be delayed here much longer, it is understood that the Air Force might send two ski-equipped planes from Winnipeg to Atlin instead of dispatching the machines which are at present in Prince Rupert. Press dispatches confirm the report that the Air Force is planning to send machines to hunt for Captain Burke.

It was learned unofficially this afternoon that the two and those in charge at the various ted States Navy planes, which have Royal Canadian Air Force seaplanes, which have been op-stalls were as follows: erating out of here for the past 10 days in the search for Pilot Robin Renahan, may be dispatched from here to At- and Mrs. James E. Further Lengthening Of Close Season and Catch Limit Opposed

Henry O'Malley, United States Fisheries Commissioner, Says Situation Is Serious and Something Must Be Done Soon

SEATTLE, Nov. 21:-Halibut fishermen here yesterday protested against the proposed new halibut treaty between United States and Canada. They opposed in particular any attempt to lengthen the present closed season for fishing or to restrict the catch. Henry O'Malley, United States commissioner of fisheries, in presenting his case, declared that the halibut fishing situation was in bad shape and some steps to improve it should be taken
