BASEBALL POSTPONED

The Prince Rupert Baseball Association advertised another game for Sunday afternoon but, for some mysterious reason, it was not played and such people as climbed the Acropolis Hill to see it were disappointed. Some of the fans are wondering why the association should advertise Sunday games if it is not intended to play them.

CRICKET IS REVIVED IN THIS TOWN

Number of Prospective Players Out On Saturday and Match Competitions to be Played

About a dozen cricket fans turned up for practice at the Acropolis Hill grounds on Saturday afternoon and, in the evening, there were even more as weather conditions were of the best. The resumption of cricket play in Prince Rupert is being sponsored by A. J. Croxford. It is expected to have match competitions before long as a keen interest is being manifested in the sport.

LIBERAL ELECTION LEAD MAY MOUNT UP TO 1000

(Continued from page one)

gain the lead in the city although there is considerable difference of views as to just how much that lead may amount to. The vote in the last federal election was 1099 for Brady and 1024 for Stork.

Other Polling Places
Anxoy Beach, which gave Mr. Brady a majority of 15 in 1926, is counted upon to at least break even this time while there is good reason to believe that Mr. Hanson will increase the lead of 12 which the Liberal had four years ago at Anxoy Mine. The two Anxoy polls are being relied upon to give Mr. Hanson a tidy margin over his opponent.

Bella Coola, which voted 102 to 39 for Mr. Brady in the last count, will turn about face to the Liberal side on July 28, reports received at campaign headquarters declare. The worst the Liberals expect there is an even break and they are counting on even better than that. Hagensborg, where the Conservatives had a lead of 17 in 1926, will also swing back to the Liberal side, it is said.

Workers at Ocean Falls are assuring the Liberal candidate a lead of at least 100 there this time instead of an adverse majority of 62 in 1926. The desire to safeguard the Australian treaty, which means so much to the pulp and paper business, is apparently the big factor at Ocean Falls this year.

Smithers, which gave Mr. Stork a margin of 110 in 1926, is expected to do even better than that for Mr. Hanson who for years has been the backbone of the timber industry, the mainstay of the central interior. Burns Lake will also go strong Liberal again.

Stewart, which gave Mr. Stork a lead of eight in 1926, is expected to break about even again. The Liberal lead at Premier Mine will be maintained. At Alice Arm the Liberals expect to convert the 12 against their last time into their favor again.

Speaking generally, the Liberals expect to increase their majority further by substantial leads in the central interior, where Mr. Hanson is so well known and popular, on the Queen Charlotte Islands, which are traditionally Liberal, and among the fishermen at the cannery points where the Howe salmon fishing regulations are still fresh in memory.

About the only places of importance where the Liberals concede the Conservatives any kind of a show at all are Hazelton, Telkwa and Terrace.

Owing to the analysis of the situation, the Liberals are counting Mr. Hanson's majority to be anywhere in the higher hundreds if not in excess of one thousand.

RAIN WOULD BE WELCOME NOW IN WHEAT GROWING

(continued from page 1)

in the south, and Waterous in the west, rainfall varied from slight showers to heavy downpours and centering on Ebenezer hall damage was severe, some sections being totally hauled out. From Waterous west to Biggar, rain fell but more moisture is needed and from Biggar west through the Dodds territory heavy storms with hail ravaged centering on Springwater were severe. In the district bounded by Humboldt, Tisdale, Padderockwood, St. Walberg and North Battleford, crop conditions are excellent. Weather has been showery with lots of sunshine and grains have made wonderful progress. Growth is a little ahead of last year while prospects at present point to the best crop in years. The same cannot be said for conditions along the Craik subdivision as all grain is stunted and suffering from lack of moisture.

In Central Alberta hot weather followed by heavy showers have improved growing conditions considerably in the Steeler-Oven-Drumheller subdivisions. Around Three Hills weather has been dry and warm and more moisture is required. Southern Alberta has been dry and warm and requires rain. Along the lines east of Edmonton where blowing was experienced, resown grain has made rapid progress but crops at present are from 10 days to two weeks later than those of a year ago.

The Peace River territory has had, if anything, too much moisture in the past week and plenty of sunshine is now badly needed as crops are growing lush but are fully 10 days later than those of last year. No damage from any source is reported and prospects are bright for a first class yield.

Light cattle receipts at western stockyards have been responsible for a strengthening of the butcher cattle market and prices have advanced from 50 cents to \$1.00 per 100 on butcher cows and heifers. This advance may indicate growers to ship more grasser cattle next week. If this occurs prices will be hammered lower. The hog market still remains steady and light butcher and feeder hogs are selling at a premium over the price quoted for hams.

AUSTRALIA BUYS MUCH OF CANADIAN

WINDSOR, Ont., July 14.—New Australian tariff will be marked effect upon certain Canadian industries, in the view of S. Milliken, in charge of sales of the Ford Motor Company of Canada, Limited, who has returned to the East Windsor plant after a six-month tour of the Antipodes. Mr. Milliken urged Canadian business men to become more closely interested upon Australian affairs.

Although on opposite sides of the world, Australia and Canada are more intimately related, and more interests and possessions similar than many countries geographically closer together, Milliken declared.

"Furthermore Australia has an excellent customer of the motor industry. For the Canadian year ending March 31, 1926, purchased approximately \$10,000 worth of Canadian goods, return for which Canada produced a substantial volume of Australian products, and absorbed directly a further large amount of Australian goods through her trade with Great Britain."
