Late Eugene Lafleur K.C. Was Perfect Bilingualist

Eugene Lafleur, K.C., D.C.L., LL.D., who died Tuesday night in Ottawa, was for many years a familiar figure before the courts of Montreal, the Supreme Court at Ottawa and the privy council in England. Hardly a great constitu- bloating vanish like magic. Bladder tional case came up for decision but Mr. Lafleur was on one side or the other. Of him Lord McNaughton, one of the members of the privy council, said: "Of all the overseas counsel coming to plead cases before this body, Mr. Lafleur has the clearest and most judicial mind.' Small in stature, Mr. Lafleur was a giant in intellect. He was prob- Mr. Lafleur was granted the honably as perfectly bilinqual as any orary degree of LL.D., in recogniman of his generation and spoke as tion of his long association with fluently before the bar in English the institution as professor of inas he did in French.

## Outstandings Qualifications

Mr. Lafleur's outstanding quali- ty of fertilizer. was the boundary line between the two countries in the Chanizel district north of Le Paso.

tions of 1904 for a Montreal seat.

Besides being the author of numerous papers on legal subjects he published a book on the "Conflicts spurs are delphiniums. in the Law in Quebec" which attracted wide attention and probably was responsible for some anomalies being adjusted. For some rears as a young man Mr. Lafleur was one of the editors of the Reveu egale published in Montreal.

Mr. Lafleur resided in Montreal. In 1896 he married Marie Alice Voruz, daughter of Louis Voruz of Switzerland. They had two sons and two daughters. Mr. Lafleur was a Liberal and an Anglican. He was a member of the St. James and University Clubs in Montreal and the Rideau in Ottawa.

## **HINTS FOR** GARDENERS

FIRST VEGETABLES

If the weather will allow working wet enough to muddy ones feet, spurs of grandmothers' gardens, sorts. It is also time to dig the soil ed. and kidney ills, pain in back go in in preparattion for later seeding. Delphinium seed should also be rows will be straight and, if pos- ate. This was usually due to plantthat all vegetables will obtain the er had warmed up. Early planted to 15 inches apart, while beans, berian ancestry, the delphinium is corn, cabbages and tomatoes re- one of the hardiest of all garden quire from 18 to 36 inches. To save plants. space it is a good plan to alternate the quick-maturing sorts, such as leaf lettuce, spinach and radish, with beets, beans, carrots, corn and omatoes. Before the later sown and later maturing sorts will require the bec for the settlement of the out- full room the earlier stuff will be out of the way. Te be tender, vege- Interesting Views Shown By Waltables must be grown quickly and this means frequent cultivation, watering when necessary and plen-

Among garden royalties must be named the delphiniums both in the Mr. Lafleur declined a judgeship stately perennial form and the anin 1907 and also nomination as a nual type which has lost the botan- layerounds Are candidate in the provincial elec- ical dignity of being a delphinium and is universally known by the common name of larkspur. Both the perennials and the annual lark-

> They are members of the Crowfoot family, Ranunculaceae, which gives us such an important list of

garden plants as the peony, columbine, clematis, the anemones, mealow rues and others. The annual larkspurs are one of the oldest fashioned of perennials yet they have sprung into the front rank of improved modern garden plants and have also made their way from the Economy Cash and outdoor garden to the greenhouse and are highly esteemed as cut flowers.

> They are one of the hardiest and most easily grown of annuals, the young plants germinating from self-sown seeds in the fall standing below zero winters and coming hrough unscathed. The seed may

be sown at any time during the winter season, the earlier the better. It must be sown where it is to grow for the best success for, unlike its perennial sister, it does not transplant well. Nothing is easier to transplant than the perennial delphiniums in the seeding line.

The delphiniums have been so greatly improved by plant breeders in the garden and the soil is not that the old-fashioned bee larkhis is the proper time to get in the worth growing. They have been first vegetables, such as radishes, quadrupled in size of flower and spinach, lettuce, carrots, the first the height and length of the bloomcabbages and other of the hardier ing spike have been greatly increas-

Dig deeply and turn in some well sown as early as possible as it gerrotted manure or some good com- minates most freely and much the mercial mixtures and before the best at lower temperatures than seed is actually sown rake over most seeds. There has been much three or four times to break up the complaint that fine strains of perlumps. Use a stout string so that ennial delphinium didn't germinsible, run them north and south so ing in May or later after the weathmaximum light. The narrow sorts, seed is certain to germinate well. It such as lettuce, beets, carrots, rad- is seed that should not be sown in ish and cress can be put in rows 12 heat for best results. Being of Si-
