## Mother's Time Off!

Bobby's asleep! A sound, restful sleep after a round of hard play. But this sleep can only come if Bobby's feeding of milk—the all essential food—has been completely absorbed and easily digested. Nestlé's Evaporated Milk has been the answer to this problem for thousands of grateful Mothers.

And here's the Reason! Nestlé's Evaporated Milk is just the best of fresh cow's milk with part of the water removed—then sealed and sterilized in air-tight containers. Add water again and you have absolutely pure, safe milk—but more readily digestible than ordinary milk because the large fat globules of the milk have been broken up into small ones of the same size as in Mother's milk. Also, the curds which form in the stomach when Nestlé's Evaporated Milk is used are soft and flaky and therefore easily digestible.

Use Nestlé's Evaporated Milk for Your Baby. Use it in coffee—in cocoa—in tea. Use it in all cooking and as a beverage by diluting with one to two parts water.
