DOING ITS PART

The Canadian National Railways, backed by the federal government is doing its part in helping to stem the prevailing tendency toward bad times. A big construction program is to be put in force and it is expected an announcement will be made before long as to the Government's attitude toward the western outlet of the Peace River. While nothing definite in regard to the port to be used is thought possible this year, there will be undoubtedly a general announcement stating that the Government is prepared to go ahead just as soon as all necessary data !is available in regard to routes and costs.

It is the general opinion that the C.P.R. and C.N.R. will collaborate in the work and that the new line will be own- winter with a considerable meased and operated jointly. This will necessitate giving the ure of success, a good deal of in-C.P.R. right of way into Prince Rupert, even if a southern port be chosen as the chief objective of the line.

It takes an expert to know when to lead the ace and hold the jack.
