### EMISSARY TO BRITAIN

Prince Rupert has had an emissary in Great Britain before, and in addition the comduring the past year in the person of the Bishop of Cale- pany in the first three months of donia. According to reports received from time to time, its fiscal year, from July 1 to Sephe has been splendidly received in the Old Country and lized very substantial profits has been in a position to tell the truth about the country.

### THOMAS EMPIRE PLAN

It looks as if Hon. J. H. Thomas, secretary of state for dominion affairs in the British Government, might have hit upon a scheme for Empire trade extension that may be ket break, so that to some extent acceptable to the British people as well as the Dominions. the appreciation registered in what Britain is the consuming country and Canada is a produc- might be termed "outside" investing country. At any rate it capital appreciation enjoyed by the will be interesting to hear more about the proposed company was far greater than the scheme.

### SUCCESS OF TALKIES

One of the most important entertainment successes of the past few years has been the talkies. The success was policy has been established, alalmost instantaneous and has exceeded all expectations. It has increased the attendance at moving picture theatres by fifty per cent and added the final nail to the coffin of the road show.

One feature of the advent of the talkies has been to cause the destruction of a lot of old films of very poor quality. With them went good films, but they are being be the general impression that the rapidly replaced by good talkies.

Prince Rupert is happy in having a first rate theatre cash and stock dividends for some with excellent pictures, as good as can be seen anywhere. time to come. Naturally there is variation in the quality. Possibly if all were first quality we should not appreciate any of them. NEW CROP than did the old movies, possibly because they are all new.

In Ketchikan there are three talkie theatres and in Juneau, two, both cities smaller than Prince Rupert. However, they do not have as fine a theatre and some of the pictures shown are not of the first quality. Within a few years doubtless Prince Rupert will have another talkie theatre but as it is, the city is well served with the one already here.

Document, It Is Expected, Will Be Satisfactory to Shareholders

MONTREAL, Aug. 27:-It will be about a month yet before the financial statement of Power Corporation of Canada for the fiscal year ended June 30, 1930, will be available to the shareholders.

In the meantime it can be said that the statement will be a good one and one that may be expected to satisfy the increasing number of shareholders who hold the company's common stock, or have invested in one or the other of the two series of convertible debentures that have provided a portion of the capital that the company has invested in securities.

As is well known, the amount of money invested in securities, apart altogether from those of companies with which Power Corporation is closely associated, has increased very greatly, and this sum far exceeds the total of investments in groups which the company controls or over which it exercises a certain supervision. The income from interest on bonds and dividends on stocks will be much larger than ever tember or early October, 1929, reathrough the purchase and sale of of these securities at high prices not only realized a profit, but left Power Corporation with large sums

This two-fold element that was favorable was offset inevitably, of coursepto some extent by the fact that in order to maintain its relation to companies such as Winnipeg Electric, Southern Canada Power, and others, it was compelled to hold ments, however, would indicate the depreciation shown in the other group of Canadian securities.

The stock for some time past has been selling in the neighborhood of \$70 a share. No definite dividend though last year there was paid out a stock dividend of 5 per cent (August, 1929), in addition to which a cash dividend of \$1 was disbursed. This year so far a dividend of \$1 in cash has been declared, and is payable today. This is still termed an company will continue to combine
