One sample here assayed \$11.30 over a width of five feet but mineralization was not persistent throughout the width of the zone exposed. Some commercial values were encountered for a distance of tone up to a point where a large beyond this fault. The face of this ently the downward extension of the main ore body exposed on the fourth and fifth levels, All work at the mine was suspended on Janu-

"Last summr an electro-magnetic survey was made of a number of properties in the Salmon River district including the Premier, B. C. Silver, Sebakwe, Cobalt, Bush Consolidated and National Silver," writes O. B. Bush, well known Stewart mining man. "This survey shows a large mineralized zone on Premier ground southwest of the mill, this being an extension of the main Premier ore zone which will probably be fully prospected with-In the next few years. The ore zone was followed through the B. C. Silver and southern portion of Sebakwe and showed several fair-sized ore bodies on the foot and hanging wall sides of the ore zone. Two other quartz porphyry zones running parallel to and west of the Premier ore zone were tested, particularly the one furthest to the west which runs through the Cobalt. This latter proved to be the largest ore

on the B. C. Silver property." Re-

opment has been carried out on

eencountered. A well mineralized

ILLUMINATION

TELLOW candle light IVI. . . so kind to beauty, so unkind to the eyes! Yet candles were long considered to be the ultimate in illumination. The past century, however, brought us kerosene and the modern oil lamp, then illumination by gas. Surely these would remain supreme!

But this swift age of science finally harnessed electricity, and with an endless supply of power flowing continu-
