### MAKE FAIR A SUCCESS

The Fair Board now has everything well under way for the annual fall fair. The prize book is just going to the mission which is working on state of the city, Dr. Cade pointed out, printers, the hall is being put in shape and the board is ac- health insurance and maternity had long been pressing for laboratively making plans for the biggest and best fair in the benefits. history of the institution.

It has been pointed out that with the placing of the Prince William on the run to the islands and other points in vancouver, possibly in Septem- would be considerable revenue and SURVE it will be easier to get exhibits in the city. Port Clements ber, jointly with the Western Hos- ne was quite confident that the deit will be easier to get exhibits in the city. While there is still a possibility of the natives entering their bands and taking advantage of the thousand dollar that time was expected and they to patients and doctors. offer of the board, if they do not come, the local boys are would be speakers. Any resolutions now able to give splendid concerts and the contest being that the local board might have to perintendent, thought it would be arranged for members of the Boys' Band will be one of the offer, the communication asked be interesting features of the fair. There will be plenty of music anyway.

Stewart is one of the best locations in the district for Tempest In Tea raising flowers and vegetables. Possibly a Stewart exhibit might be arranged that would show the people of the other sections what that live little town is capable of doing. It would be good advertising for them and Prince Rupert would do well to encourage the idea.

The offer of the board just made to give three good prizes for a floral display is one that should encourage flower growers to take part and show what they can grow and how artistically they can arrange their exhibit.

What is needed now is for local people to be a unit in support of the fair, to talk about it and try to induce outsiders to pay Prince Rupert a visit at that time.

### UNITED EFFORT NECESSARY

In the next few months the people of the city will be divided over the election of a member to represent them at the board, on which he had not Ottawa. Some will support one candidate and some an- been consulted. He wondered how other. While it is a serious matter it is not sufficiently ser-many more there were. He thought ious to cause people to be at outs with their neighbors. It he was entitled to know, before should be looked upon somewhat as a sport event in which hearing these reports at a general meeting, what was going on on the supporters of either team root for their side but keep the committee of which he was a happy and refuse to be so serious about it as to allow it to member. interfere with their other activities.

Though we shall be divided in politics, let us be united for the fair. It is one of Prince Rupert's institutions and must be made a credit to the city and district.

## ALICE ARM

A large new deposit of molybdenum ore, 200 feet in width, has been discovered on the Tidewater Molybdenum property which is under development by the Dalhousie Mining Co. The strike made quite a sensation here and was hailed as one of the most important that has been made in the district for some time. A shipment of 100 pounds has been sent to the Mines Department laboratories at Ottawa for mill test

ed as far as Mile 6 where heavy slides of clay have been cleared from the tracks, and the work of clearing new streets and lanes in the town of Alice Arm is proceeding.

For this pur- Canadian Pacific. layout representing a mountainous range in miniature which can be developed in one's own garden. While there are literally thousands of species of alpine plants from all parts of the world, the number that are proving hardy in Canada is limited, and the novice would be well-advised to confine himself at first to any or all of the following varieites which are obtained either as seed or plants; the three best Phloxes (obtainable in plants) only) are: Subulata in white, pink and lilac; Amoena, pink and divaricate in white and pale lavender blue; Violas may be secured in many pleasing colors, there are two Primulas, the cortusoides, a rosy lilac, and denticulata, a white to lilac rose, two Arabis, the alpinus, a white, and the alpinus roseus, a pink. Other plants include Alyssum saxatile compactum (yeilow); Aubretia, (various); Armeria, (rose and white); Calamintha alpina (purple); Campanula carpatica, (blue and white); Cerastium tomentosum (grayish foliage with white flowers); Cheiranthus allioni, biennial (orange); Dianthus deltoides (rose-pink); Gypsophila repens (white); Helianthemum mutabile (various); Iberis sempervirens (white); Linaria alpina brids (various); Silene schafta (rosy-purple); Tunica saxifrega (pink); Veronica prostrata (blue). Lychnis alpina (bright rose).

The secret of successful rock gardening is informality. Use irregular shaped stones, planted firmly, with the pocket of soil between leading back into the centre of the Good progress is being made mound, so that there will be full with work in the district by the pro- room for root development and vincial public works department. moisture supplies will not be cut off.
