DAILY EDITION

HOUSES ARE NEEDED

Recent arrivals in the city are finding it difficult to se- ment. cure houses. Some of them are waiting until they can hear of someone leaving and in the meantime their wives and families are remaining in the south.

Building lots can be purchased at low prices. If they cannot be purchased elsewhere, the city has some, although the latter will not be in the best locations. The choice lots are practically all held by private owners.

It has been suggested that there might be money in Thursday for Prince Rupert, is building houses for sale or rent. There is certainly a de- visiting her mother in the General | Phill Brunell is making preparamand.

It is spring and we should join with all nature in trying to make the world more beautiful.

THE CITY BEAUTIFUL

This is the time of year to once more consider the desirability of improving the appearance of the city. The most important method is by cultivating gardens and lawns around the houses. Another is by keeping fences in good shape, back yards neat and buildings painted.

Already Prince Rupert is becoming a pretty place in the summer. The stumps on vacant lots are overgrown and there are so many nice lawns and flower gardens that a walk around town becomes enjoyable. But there is room for improvement. Those who have gardens can improve Hospital, is doing nicely. them and those who have not started might well begin to do their part.

People living in houses or apartments that have no gar- treatment and returned Saturday. Gowanbrae. She is accompanied by dens can do a good deal by means of window gardens. Spring is here now and it is time to begin work.

He who plants a garden is more greatly to be esteemed than he who accumulates a fortune for some other to spend.

KEEPING BUSINESS AT HOME

One way to keep business at home is to get out after it holiday in Prince Rupert, returning and see that it is not sent away. Take as example the saturday. printing industry. Representatives of the two local print shops go out after business and by doing so find that they can prevent at least some of it going away. By personal contact with the prospective customer they are able to present the points in favor of home production. They know pretty nearly every man who sends his printing away and can take steps to head it off.

In ordinary retail business it is not possible to get in touch with all the customers but they can do so by means of the newspapers. By showing that they can sell articles ing splendidly in the Hazelton Hosas cheaply as they can be purchased elsewhere, they are pital. able to head off some of the business going to the big department stores. This is the most efficient method of stopping business from going south or east.

Another method is to see that there are no overcharges. We have had a number of people come to us and say: "Why should we buy here? I went to a store the other day and they asked me 25c for an article I wanted. The same shovel, pulled out on Friday, after article exactly is listed in one of the mail order catalogues at 10c. You cant expect me to pay 150 per cent more for goods than I can buy them for by sending away."

The case in question was just one of carelessness on the Rupert is visiting her parents, part of the local merchant. He had not exercised sufficient care in marking the goods and this overcharge had slipped in. Had it been offered at 15c the business would not have been lost and with it \$10.00 worth of other busi-

The fault is not altogether with the local residents who send out of town. What we suggest is reasonable co-operation. Let the merchant take care that there are no overcharges and then he can ask the local residents to spend Anglican Church when a balance money with him. We mention this because so many people on hand of \$1,500 was shown. The have come to us and told us they have been "stung" as following officers for the year they called it.

Uncle Sam and John Bull find the navy burdensome but almost impossible to drop it.

Man in the Moon

Yes, Spring is here With wind and sun, So lets enjoy It Everyone.

Away with whines And groans and roars Its time we all Were out of doors.

Avaunt the blues And angry screams, For spring is only Pleasant dreams.

For we have seen The spring's bright dawn So winter clothes Go back to pawn.

Tis time of love And whisperings, When lad and lass Feel that spring springs.

Tomorrow is the first of April, don't be a fool.

On April 1 It is the rule Both young and old Just play the fool.

Butcher-Excuse me, madam, but you haven't yet paid me for the turkey you had at Christmas.

Customer- No, my husband sprained his wrist so badly carving it that he hasn't been able to write out your cheque yet.

Fair King's supporters, with improvised megaphones, cheered team when King's met Guy's in recent semi-final of Hospitals' Rugby Cup trials at Richmond, England.

Possibilities of Prince Rupert As the Location For a Pulp and Paper Mill Are Set Forth

There is not a place on the American continent so advantageously situated as is the neighborhood of Prince Rupert for a pulp and paper mill, according to M. P. Mc-Caffery of this city. Mr. McCaffery was raised in a mill town and has kept in close touch with the operations of paper mills ever since. Only a short time ago he had occasion to make a thorough survey of the possibilities of the district in this respect and as a result of that survey and of the reports made by others, he feels very confident that what he says is correct and he gives his reasons as follows:

Prince Rupert is located in the centre of the greatest pulpwood area in British Columbia. In the Naas River area alone the forestry report states that there is nine billion feet of pulp timber. At Kitimaat Arm, 100 miles south, there is a large area, and over the whole of the irregular coast country there is pulpwood which would be available for a mill.

Because of this ready availability, pulpwood can be produced in this district cheaper than in any other part of British Columbia.

The huge country between Prince Rupert and Prince George could be drawn on for pulpwood if necessary and the cutting of this would help to bring prosperity to the people of the interior just as is done in Eastern Canada, where much of the pulpwood is shipped by rail across into the United States.

The supply of pulp timber is so large that there need never be any fear of running short.

At the point where rail and water meet is the logical place for big industries and such a place is Prince Rupert. Porpoise Harbor has a site that has been looked upon with favor and there are other sites available. A plant could well be established on Kaien Island.

Mr. McCaffery says he has for the past ten years discussed this matter with people who have been experts or who know something about some phase of the business and he has not yet had one person dispute the fact that the situation is ideal for the purpose. The difficulty is that millions of dollars are required to build and operate such a plant and there is always difficulty in getting it started.

Mr. McCaffery says he knows that many interested people have looked over the field and all agree with what he says. Even now the matter is being seriously considered and the question of finance is the only thing standing in the way. Formerly there was the lack of power to cope with, but now that power in quantity is being provided by the Northern B. C. Power Company, and will be available in a few months, he thinks he sees the consummation of such a project likely in the very near future.
