## A MILLION FAT FOLKS PROSPECT CAN'T BE WRONG

And that's a low estimate of the number taking Kruschen to keep down superfluous fat.

When you take vitalizing Kruschen Salts for a few days that old indolent arm chair feeling deserts you - it doesn't matter how fat you are—the urge for activity has got you and you're "stepping lively."

And best of all you like this activity you walk a couple of miles and enjoy it-you thought you'd never dance gain, but you find you're getting as spry as ever-the old tingling, active

feeling reaches even your feet. Kruschen is a combination of the six salts Nature has already put into your body to keep you alive -if it were not for these vital salts you could

One bottle is enough to prove to you that Kruschen will make you feel younger — spryer — more energetic you'll enjoy life every minute of it. A half teaspoonful in a glass of hot water every morning is all you need to keep healthy-keep your stomach, liver, boweis and kidneys in splendid condition-free your system from harmful toxins and acids.

Tooth and Howse Complete Season's Work On Stewart

STEWART, Oct. 27: - W. R. Tooth and L. C. Howse have recently completed a very satisfactory season's prospecting on their Palmy group of nine claims situated on Bear River ridge between the Dalhousie and M. C. Mining Co. properties, at an elevation of from 3500 to 6000 feet.

Confining their work to detailed surface prospecting, the owners claim to have located a silicified sheer zone about 14 feet wide and traceable on the surface for something over 300 feet. This is at elevation, 4000 feet. The zone has a strike of N. 70 deg. W., and contains zinc blende, galena and pyrite in a quartz gangue, in what appears to be a grey tuff formation. With such encouraging results from what little preliminary work has been done, the owners feel justified in planning more extensive development next season.

Putting in a large open cut near the north end of the sheer as far as owners opened a width of 14 feet of mineralized material interlaced with stringers of solid sulphides, which gave assay returns as high

Messrs. Tooth and Howse were encouraged to prospect this ground as a result of reading the geological report on this section made by Dr. following paragraph dealing with likely sections of the Bear and Marmot Rivers: "Bear River ridge between the Prince John and Dalhousie groups of claims probably contains undiscovered copper de-

To Wage Earners, Everywhere in Canada.

## Don't be Penny Wise Pound Feolish!

Has it ever occurred to you that bargains, even honest-to-goodness bargains, are not always an unmixed blessing?

Of course many so called bargains are not real bargains at all. Like the rosy apple that is rotten at the core, they appear to be something that they are not. A bargain is only a real bargain when it is offered you at a price less than what the article is really worth.

Due to causes that predicate a loss to some Canadian producer, real bargains are sometimes available to you. And when they are, and you need the articles offered, you would be foolish not to take full advantage of them. For if you don't, someone else will! Meanwhile anyone buying them is doing the Canadian producer a good turn by helping him to dispose of merchandise that, for one reason or another, he is compelled to convert into immediate money.

But when the subject of the bargain is a foreign-made article, the whole situation takes on a different aspect.

Like as not the foreign producer, whom you would be helping out of a jam if you purchased his bargain, has a production cost that is far below the Canadian cost of producing the same article. And if you were to institute enquiries with a view to finding out why his production cost was so much lower, like as not you would find it was because he was paying his employees rates of wages that were away below the scale paid for similar work in this country.

In that event, it would be reasonably safe to assume that a much lower standard of living prevails among the workers in his country than prevails here. Possibly he requires his employees to work longer hours than is customary in Canada. Possibly the Jaws of his country are not as strict as they are here regarding the employment of child labour. Possibly he is not taxed, as Canadian manufacturers are taxed, to ensure compensation on a reasonable scale being paid his workmen who suffer injury in the course of their employment. Possibly he is not required to maintain his factory at anything like as high standards of ventilation, of sanitation, of heating, of lighting, of protection against fire and accident, as are in force in Canada.

In all these matters-hours of labour, rates of wages, standards of living, factory inspection, social legislation and industrial betterment work-Canada is much more advanced than most of the nations that make products similar to hers. The result is that Canadian wage earners are more fortunately circumstanced in almost every way, than are the wage earners in most other countries. Obviously they can only hope to retain those advantages as long as their employers, the manufacturers of Canada, are able to overcome in the domestic market the competition of foreign-made goods that are produced under longer working hours, lower wage scales, and lower standards of living. For should the time ever come when they can no longer compete, either their Canadian employees must agree to wage reductions and the loss of decent living conditions, or the manufacturers themselves must close up shop.

You can see therefore what serious trouble these bargains in foreignmade goods may cause you-what serious trouble any foreign-made goods may cause you whether they be bargains or not-if you allow yourself to be persuaded into buying them. Should you say there is nothing harmful in buying them once in a while, you will probably see nothing harmful in buying them every chance you get. And if you buy them every chance you get, you cannot blame others for doing the same thing. Once everybody in Canada starts doing it, you know what will happen!

So for the sake of a small immediate saving or merely to satisfy a passing whim, why run the risk of setting in train a movement that in a few years might easily prove your undoing! Wouldn't it be far better for you, and your family, and all your friends, to stand fast by the policy of buying "Produced-in-Canada," as the surest means of protecting Canadian rates of wages and Canadian standards of living?

Very sincerely yours,

Minister of Trade and Commerce.
