The Political Corner

No. 22.

Does Mr. Brady Know?

Messrs. Stevens and Brady are busy telling the people that the Mackenzie King Government has reduced taxation.

We might believe them if we did not happen to know differently. Our own individual experiences have made it very clear to us that our taxes have been lowered in the last five years. All of us know that the three cent postage has been reduced by the Liberals to two cents; we know that they abolished the receipt tax altogether and that the tax on cheques has been so much reduced that we now pay only two cents on cheques larger than \$10.

Our business men all know that the sales tax in 1921 was three per cent whereas today it is only one per cent, but, of course, Mr. Brady cannot be expected to know this.

Those of us who were fortunate or unfortunate enough to have to pay an income tax know that in 1921 a married man with two children paid a tax on all income over \$2600, whereas today he does not pay unless his income is over \$4900. Mr. Brady must know this and he must also know that his exemption for each child has been increased from \$300 to \$500, a substantial advantage to Mr. Brady.

And there are those of us who today do not have to pay any Dominion Income tax at all, whereas on the same amount of income five years ago we had to pay very heavy taxes indeed, and it is very idle for Messrs. Stevens and Brady to try to tell us that this is not so.

The thing which does puzzle us, however, is why they say such things. Why do they waste the time of the electors with such piffle?

If Mr. Brady does not know better, then, as a public man and a lawmaker, he should.

If he does know better, then as a public man the electorate will have to teach him that it does not pay to attempt deception.

Perhaps Mr. Stevens will be prepared to tell us on Monday evening that we are quite mistaken and that our taxes have not been reduced at all, and that we are each of us paying just as much taxes to the Dominion Government as we did five years ago.
