MOVE FORWARD ALTOGETHER

Conditions are improving in the city. There is a general ing industry of the north. There is tendency towards betterment and pretty soon we shall be no one who is more interested in seeing the city grow. This is the time to forget petty dif- the development of the north than ferences and move forward together. There may be a I am but in the right way. political fight, but do not let that distrub us. If we honestly desire to benefit Prince Rupert we shall work hard, keep spawning herring, but to say the cheerful and do our part in the development that is sure least it is very misleading. The to come.

COST OF POLICING CITY

It is pointed out by Alderman Brown, chairman of the Ryan's Point. board of works, that the actual cost of policing the city is spawn than in former years but it really \$3,835.94 less than the amount stated in an article is only because very little spawn published in this paper Wednesday. The total cost includ- can be got today. As regards the ing the police magistrate's salary and one-third of the use of oolachan grease being on fines remitted to Victoria was given as \$15,795.77. This the decline I would like to state was according to the statement of the treasurer and was simpson to the Naas to make correct as far as it went but it did not take into account grease this year than have for the sum of \$3,835 paid into the city treasury as two-thirds quite a few years. of the fines collected. That would bring the total back to If Mr. Bushby would read my \$11,949.83 including the salary of the police magistrate. The original statement was prepared as a guide in dealing with the government at Victoria and it was not necessary to show it.

CONDITIONS OF THE COUNTRY

There is no doubt that a combination of financial and industrial circumstances has had a very trying effect upon the whole continent during the past few months. In many places there have been many men out of work and relief has been necessary.

All the authorities tell us that there is nothing basically I fail to see the difference bewrong and that in a very short time we shall be back to land in February or March and normal. However, this does not mean that securities are likely to advance in price to any great extent although it is impossible to tell what may happen. Those who bought to the growth of the spawn in the when prices were high had better write off their losses and fish. Most probably if the herring get to work again.

THE TIME TO DIG

This is the time to dig in the ground. Get close to nature number one fish. for nature is a great teacher. For people living in the city The Marine Product Plant emgardening is not only a most helpful recreation but is a ploys 40 men and would like to work of public benefit in that it helps to beautify the city. employ one seine boat with a The householder who makes no attempt at heautifying crew of five to keep the plant

The householder who makes no attempt at beautifying moving for a month or so of oththe grounds around his house can hardly be said to have a erwise slack time. The article home. It is simply a house. A home includes both house states that the herring are very and grounds.

Prince Rupert people are awakening to their responsibilities in this regard. They are endeavoring each to do a part in making the city what it should be. Gradually the work will extend until the person who refuses to have a garden will be looked down upon by all the neighbors.

Beware of the person who double-crosses you. He is liable to do it again.

HERRING FISHERIES

Editor Daily News:

In answer to the article by Geo. Bushby and the editorial on the herring industry in the issue of the 8th of April I am sorry to say that I cannot view the subject in the same light as Mr. Bushby and the Editor sees it. It must be because I am always in actual contact with the fishing industry and can see things in the naked truth. One would get the idea from the severe criticism that my humble letter on the shameful depletion of the herring got that I was taking a personal dig at the Reduction Plant and Prince Rupert. On the contrary, I was born in British

I do not know where Mr. Bushby fact is that the herring spawned at Tugwell Island and a few days ago the water was a little milky at

I agree that the natives use less

letter again he will see that I did not refer to the loose seaweed that used to be washed up on the beach but to the growing seaweed and 'legi" that grows at low water

It is very true that the herring change their spawning grounds from choice or interference of man, but by the way the herring are foresaking the shores of the Pacific coast they must be spawning in Japan.

one here at the same time of the year. They are both poor owing here were fished out at sea in the proper time of the year instead of on the spawning ground in the spawning time they would be a

poor as regards oil and general reduction purposes. If such is the case I wonder why they would bother with the herring at all.

Neither Mr. Bushby nor the Editor questioned my self-evident statement that the fisheries of Alaska are sorely depleted. Then I take it they they will agree that if we keep on the way Alaska has done the fertalizer plant, the people and the fish of the sea will all soon be without herring.

As regards the statement that the fisheries are undepletable, it is the same old gag that was handed out to the people by the government and canners prior to the year 1927. We fishermen knew especially municipal debentures, the fish were going fast but the in the Saturday Evening Post describes the fishing situation on the Pacific coast under the fitting title of "Kidding Ourselves Along."

Is it necessary that we take all the herring in the sea today? We have to live tomorrow and our children after us.

BODIES by FISHER

Complete with every modern comfort and comvenience feuture A A A A A

"ODAY, "Body by Fisher" denotes the world's standard of quality in automobile coachcraft. And among all cars in the lowest price field . . Fisher Bodies are exclusive on the new Chevrolet Six.

That is the reason for Chevrolet's outstanding beauty . . for the graceful fleetness expressed in its long, low lines . . the instant impression of luxury conveyed by no other car near its price.

In the appointment of Chevrolet's roomier interiors, no refinement which could conceivably add to beauty, comfort or convenience has been omitted. In the sedan, for instance, are found satin-covered assist cords, arm rests, decorative door panels and attractive smoking sets. Draft-proof

piping in all closed models seals the seams where doors and body meet. Seats are wider and deeply-cushioned, with formfitting backs.

Chevrolet brings striking beauty . . and more. It combines six-cylinder performance . . the smooth, quiet power which nothing less than a six can give . . with low initial cost and exceptional economy. With all its advanced features, that ensure safety, handling ease and riding comfort, the Chevrolet Six is available at new extremely low prices. More than ever hefore is its matchless dollar-for-dollar value apparent. See the new Chevrolet Six today . . drive it yourself. And ask about the attractive G.M.A.C. Deferred Payment Plan.

It comes up smiling

This NEW GILLETTE BLADE and RAZOR

is reinforced against hard knocks

TTOW many times have you dropped your old Gillette on wash-bowl or floor? More than once, probably. Usually no harm was done, but not always. Sometimes, after such an accident the blade "pulled."

Gillette engineers, in seeking the cause of "razor pull," questioned thousands of Gillette owners and examined tens of thousands of old Gillette razors. Practically every razor that "pulled" had been dropped. The corners of the guard were dented. Not much . . . but a Gillette Razor is a precision instrument. Even a microscopic dent was enough to throw out the adjustment, to cause "razor pull."

In designing the New Gillette Razor and Blade, Gillette engineers reinforced the razor corners with extra metal. They cut out all four blade corners. Now it's hard to dent the razor. But even if you should, no harm is done, for the new blade is not held at the corners when cap and guard clamp together. Your shave remains perfect, no matter how much this razor is dropped.

That's one great improvement. There are many more in this new shaving tool. The New Blade is made of steel which has been specially processed to resist rust. No more cut towels. No more tedious wiping of razor parts. A simple twist of the fingers turns the guard at right angles. Then retighten and hold under hot running water. Shake thoroughly. Lay on the shelf. That's all the drying you do.

Gone are the old center posts. You'll never nick another blade on them.

We are making every effort to keep up with the demand for the new razor. We hope you will not have to wait for yours. But if by chance you should, you can use the New Gillette Blade in your old Gillette Razor for the time being. Visit the nearest Gillette dealer today before his supply gets low.
