DAILY EDITION

THE ECSTALL COPPER

Renewed interest is being taken in what was once known as the Dunsmuir mine up the Ecstall River which was examined this week by two engineers. This property was staked many years ago and held by the Dunsmuir Estate. Twice the Granby Company had it under bond and each time released it. Now it is reported that the same company has it under bond again and that the Consolidated has a large group of claims surrounding the original property.

The property was thoroughly examined years ago by government engineers and the ore was found to carry something like three per cent of copper with a very high percentage of sulphur and iron. The reason it was not worked was because of the difficulty at that time of utilizing the sulphur and iron, the demand being only for cop-

At Anyox in the old Hidden Creek mine they worked profitably copper ore carrying only one half to three quarters of one per cent copper. But that was easy to separate. According to former Anyox superintendents it would take a very costly plant to handle the Ecstall ore. There is plenty of it and it is readily accessible. The only difficulty is the complexity of the ore.

Here is an interesting camera study of a small cove down east where the men go down to the sea in ships. It is Ingonish Ferry, Cape Breton, Nova Scotia.

New Oil Goes Miles Farther

AND THRU 6 SPECIFIC ADVANTAGES BRINGS BETTER LUBRICATION TO YOUR HIGH COMPRESSION CAR

BRITISH SUCCESSION DUTIES

The British succession duties are abnormally high and they have been increased under yesterday's budget by 10 per cent. When a rich man dies in England, half of his wealth is taken by the state, the other half going to his heirs. That is looked upon by some people as confiscation but it is probably a very righteous law. The only difficulty is that it is apt to injure the country which enforces it.

While the passing of property from father to son has always been looked upon as the proper procedure, there is a school of thought arising in the world which objects to wealth being kept in a family and declares that all men should be equal in opportunity. That is a democratic view but it is difficult to work out. In choosing a new country people of wealth usually turn to one where the children will inherit their wealth and where it will not be taken by the state. That is why a wealthy person would not today choose to make his home in England. While agreeing with the Labor government in its ideal we doubt the efficacy of the legislation which if carried too far tends to defeat its own ends.

AOTORITE is the new oil that Meets all six lubrication requirements of your new high compression car.

It has the ability to cling extra tightly to metal. Thus it forms a • perfect seal between piston and cylinder wall to resist the intense pressure developed by gas explosions above. This enables you to obtain the full power from your high compression motor that the designer intended. 2. It is super oily or slippery, so keeps friction at a minimum. This means smoother operation.

3. It also has a great capacity for carrying away and giving up heat. When traveling long distances at sustained high speeds it keeps your motor cool.

4. MOTORITE definitely resists dilution by "giving up" stray gasoline in the form of vapor without harming the lubricating efficiency, or life of the oil.

5. This new oil deposits less carbon and only the soft, fluffy kind that blows out thru the exhaust. There's less wear on rings and cylinder walls when you lubricate with MOTORITE-less need for engine repairs.

6. And MOTORITE, through special purification processes, is com-pletely freed from acid-forming tendencies. It cannot corrode your motor.

With the first sign of spring at St. Louis, Mo., Zoo animals caged caged all winter are allowed outside. Here is Mike, the chimpanzee, one of the first to be let out.

These advantages mean more efficient lubrication for your high compession car-yet longer oil life. Now, with MOTORITE, you can drain at 200 miles farther than you have been in the habit of doing.

40c a QUART

MOTORITE is sold at all Union Oil Company service stations and wherever you see the MOTORITE sign. Quantity production and quantity sales bring its cost to only 40c a quart.

Specify it by name-MOTORITE.

UNION

Use it with UNION ETHYL for best results in high compression motoring.
