## Notorious Evangelist Confined to Cottage and Rumors Circulate

Is Reported to Have Had Fisticuffs Engagement With Her Mother Who Is Now Suffering From Broken Nose

LOS ANGELES, Aug. 20: - Mystery surrounding Aimee Semple McPherson's isolation at a Malibu Beach cottage remained unsolved today as conflicting reports of her illness went unanswered. One report says that blindness is the cause; another suggests a face lifting operation and, still another, said that she had had a fistic encounter with her mother, Mrs. Minnie Kennedy.

Mrs. Kennedy is undergoing treatment for a broken nose which, she says, her daughter gave her but which the Los Angeles Examiner quotes the daughter as denying, stating that her mother had thrown herself on the floor screaming and crying.

Dr. Edward Williams, nerve specialist, said that Mrs. McPherson was not seriously ill.
