Improvements At Hospital

House Committee Report Last Night
Told of Work That Had Been Done

Reporting for the house committee at last night's meeting of the hospital board Ald. W. M. Brown announced that a tender of \$62.35 from Alex Mackenzie for three dozen blinds had been accepted. This tender was the lowest.

A new 183-gallon domestic water boiler had been installed the committee reported.

Trouble had developed in one of the water sterilizers in the operating room and, while temporary repairs had been made, it would be necessary to obtain a new filter. The secretary was authorized to purchase the filter.

An automatic door stop had been installed on the front door.

The committee reported that all tenders for the proposed new lighting system in the operating room were not yet in.

A suggestion from Frank Dibb that new castors should be obtained for many of the beds in the hospital was passed on to the house committee. Steps are already being taken by the managing secretary to rectify this.

Compensation Is Discussed

Hospital Board Is In Receipt of Communication Setting Operation of Act Out In Detail

Workmen's Compensation Board cases were again discussed at last night's meeting of the hospital board following the reading of a circular letter from the board in which details of regulations required under the operation of the Act were clearly set out. In connection with hospitalization for workmen, strict economy and efficient treatment were the prime requisites as far as the benefits of the Act were concerned. Under the Act, if it were not necessary for the workman to have hospital treatment, then he should not be in the hospital. Neither would compensation be paid if a person remained unduly long in hospital.

Al. S. D. Macdonald did not think that any workmen would wish to stay in hospital after such time as treatment became no longer necessary. At the same time, a patient should be fully recovered before being discharged under the Act.

After further discussion, the communication was filed for future reference.

There is about \$35,000,000 invested in Cold Storage Canning & Curing Plants for Fish in Canada. Of this about \$20,000,000 is invested in British Columbia, and about \$12,000,000 in Prince Rupert District.

New Auxiliary For Hospital Board's Wish

Voiced By Vic E. Jackson, Section Foreman at Salvus, 55 Miles East of Rupert

"Salvus Station, Nov. 13, 1930
McRae Bros. Ltd.—Received new Victor Radio O.K. I can honestly say it's the best I heard yet. It's both loud and clear. I was told by quite a number of people that this was a bad place for radio. I wish they could hear the results I get with this radio. Another good point, I don't have to worry about batteries for quite a spell. And that is one big item when you live so far from town."

VIC E. JACKSON.

Victor Radios, both battery and electrical, give perfect satisfaction, always.

Rheumatism So Bad Could Hardly Walk

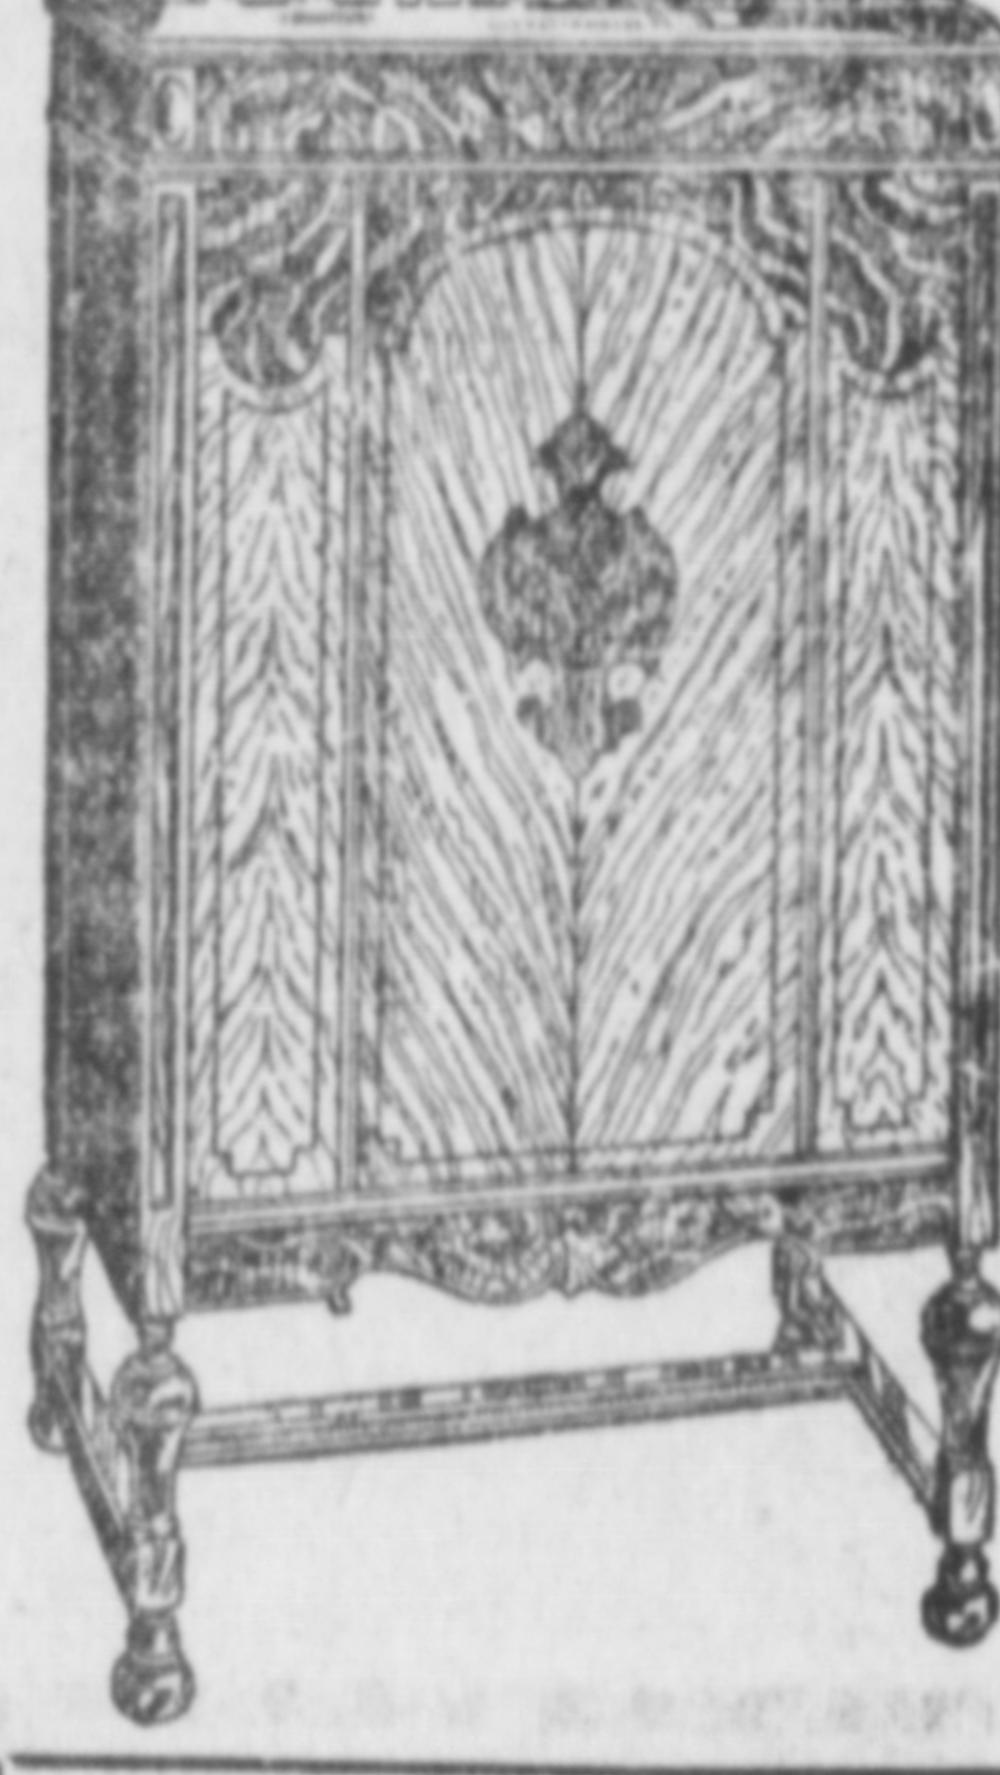

Mrs. Wm. Krenz, R.R. No. 1, Guelph, Ont., writes:—"For years I suffered with rheumatism, and at times, I could hardly walk, but could not sleep or rest for pain. I used different kinds of medicine but got nothing to do me any good until a friend told me to take Burdock Blood Bitters. Now I have no more pains and the rheumatism is all gone."
