Annual Meeting of Dalhousie Co. - Interior Coal

Proving Popular — McGill Reviews Activities

In Omineca Mining Division

At the annual meeting of the Dalhousie Mining Co. Ltd.,

which was held recently in Victoria, the president, in his

address, stated that it was hoped by next spring to have

actually blocked out sufficient ore to keep the proposed

mill at the Molybdenum property near Alice Arm running

for two years or more. In view of the length of ore bodies

exposed on the surface and allowing for them to extend

downward for a reasonable depth, there was probably, as

a matter of fact, sufficient ore for the property to keep a

indefinite period. Efforts to finance Vancouver mining engineer, made

the work have met with excellent a brief examination of this property

success and, within a short time, it in October and is said to have been

favorably impressed with gold-

b'smuth showings which have at-

completed and the property in pro-

and settling down for the winter finds Omineca mining division not Hogether without some hopeful igns writes L. S. McGill, well known awyer and mining man of Smithrs. The activities of W. R. Wilson 'z Sons on the Ingenika River have accomplished a great deal and some f the Finlay River prospects taken ip last year are said to be showing ip very well. Consilidated Mining z Smelting Co. carried out an active eason of work on the Emerald proerty in the Sibola region, southvest of Houston, but it is reported lone did not meet with quite as nuch sucess as might have been inticipated. Another field where Consolidated was also working during the season in the vicinity of Takla Lake and Driftwood River where promising copper and gold howings are said to have been discovered. In the Omineca River and Manson Creek sections placer opertions were carried on by a numper of operators, including Consoldated. Distance from transportaion has been always a serious landicap for this section but the Twenty Years Ago construction of a new government oad into the area from Fort St. James appears to help out in this espect while the Peace River rail outlet through Peace River Pass will be sure to put the district on its leet. In the Babine Range, some The Harris Bros. have refused work has been carried out on the Fronin mine and it is concurrently be opment program on the property in commencing in the very near future. Such work as has been done in the past two years has opened up which has met with success. The nost recent work in the main tunnel of the Silver King has advanced tunnel as a drift on ore for fifty feet and some remarkable showings vorably impressed with what he saw. Glacier Gulch group on Hudson Bay Mountain is still under negotiation for a deal but so far none has been closed. J. B. Woodworth,
