LEAGUE OF NATIONS NOT BAR TO TREATY Growth of Commercial

British Government's Right to Enter Security Pact Challenged By Conservatives in Commons

MATTER SETTLED

LONDON, April 8:—(Later)—Foreign Minister Briand of France, after a conference with Premier Macdonald of Great Britain, told French journalists late today that an agreement had been reached between Great Britain and France on the interpretation of Article 16 of the League of Nations covenant and, therefore, negotiations at the naval conference would be continued with a view to achieving a fivepower treaty.

LONDON, April 8:-Yesterday the right of the British government to enter a security pact with France was challenged by the Conservatives in the House of Commons. It was argued by the opponents of the Labor government that the obligations of the country under the League of Nations would interfere with the obligations of the country under a security pact with any individual country.

Premier Macdonald defended his actions in a speech in which he reviewed the League of Nations' constitution and the manner in which the rights of individual nations were settled and claimed that his government was quite correct in the action it was preparing to take.

TIMBERING

Log Scale Totalled 4,474,031 Board Feet in Prince Rupert District

The timber scale in Prince Rupert district for the month of | yesterday by Hon. Charles + March totalled 4,474,031 board feet | Stewart, acting minister of im- & made up of the following varieties:

Fir, board feet Cedar, board feet Spruce, board feet Hemlock, board feet 173,097 Balsam, board feet Jackpine, board feet

Poles and pile production totalled 37,280 lineal feet consisting of 32,740 lineal feet cedar and 4,540 lineal feet hemlock. A total of 52,433 hewn jackpine ties were recorded and 85 cords of cordwood.

The timber scale for March this year shows a big increase over the same month last year when it amounted to but 1,303,347 board

The scale for the first three months of the present year totals 8,255,614 board feet as against 6.-161,075 board feet in the same period last year.

Use of Herring For Manufacture of Meal and Oil Is Discussed By George Bushby of Prince Rupert

He Answers Criticism of Those Who Object to the Taking of These Fish For His Plant at Tuck's Inlet

The question of the use of herring for the manufacture of fish meal, oil and other commodities is an important one and has been up for discussion on various occasions and most people are now agreed that it is just as important to manufacture the fish into these important ingredients employing a large staff of men at Prince Rupert as it is to permit them to be salted by aliens and shipped to the Orient to feed the people of China and Japan. The meal is used to feed poultry and cattle in this country in order to feed the Canadian people.

The matter comes up in connection with a letter received by the Daily News criticizing the taking of herring near Pearl Harbor for use at the Prince Rupert reduction plant. On receipt of the letter, which attacked a local industry, it was thought fair to give that industry an opportunity to defend itself. George Bushby, proprietor of the plant, was interviewed in regard to matters mentioned in the letter and he says:

"This year our plant has used a total of nearly 5,000 tons not 18,000 as suggested by your correspondent This amount would have hardly any effect on the stupendous quantity of herring in these waters. They were not taken, none of them, in Pearl Harbor. The fish that came to us were taken outside that harbor." Discussing the question of spawn,

Mr. Bushby points out that the waters from Port Simpson to Tugwell Island were literally cream colored from the large amount of milt (Continued on page six.)
