Do you Look for a

"Bite" in Whisky?

Many cheap and inferior whiskies are noted for their "kick"

or "bite." A "bite" is the result of adding raw spirit to the

blend. Actually a whisky with "bite" is usually much less mature than a whisky with none.

One reason for the world reputation of "White Horse"

Whisky is its complete lack of "bite." The rich, creamy body

is acquired after many years in the wood. When deep in its maturity and properly "married" White Horse is bottled—ready for the world's approval. A more mellow, generous and delightful spirit than White Horse is not obtainable.
