W. P. Hinton to Develop 5120 Acres Alberta Sands

A permit to develop an area of 5120 acres of bituminous sands in Alberta has been granted to Walter P. Hinton, Toronto, former G. T. P. railway official and well known here. The permit was issued on June 14 and was made operative under regulations which those bituminous sand rights may be disposed.

Those regulations were the subject of interchanges between Hon. Charles Stewart, minister of the interior, and Premier J. E. Brownlee of Alberta, during the Easter recess of Parliament, and were arrived at in the light of the pending transfer of the natural resources to the province.

NEW ORDER FOR POLES

Will Help Unemployment Situation in Central Interior During Coming Fall

New orders which will ensure continued activity in the pole camps of the Skeena River section came as a result of the visit to the district during the past month of J. E. Seaman, Spokane, western manager of the Page & Hill Pole Co. Definite orders placed following an inspection of stock in the assembly yards of the Hanson Lumber & Timber Co. at Cedarvale, Nash and other points along the railway line will mean many carloads of poles for export shipment and these are in addition to big orders already received which are held up for shipping instructions.

With old orders still blocking the yards, it will not be before the first of August that work can be started by the company on the Page & Hill order. The new order will help to bridge the seasonal gap in employment which usually occurs between the end of the pole season and the start of tie cutting.
