Are You a Judge of Whisky?

A more mellow, generous, and delightful spirit than "WHITE HORSE" is not obtainable.

MEN have been known to think, and even heard to say, that the whisky with a "kick" or a bite is stronger than the whisky without it.

It is seldom so; the "kick" is due to one fact and one fact only, which is the admixture of raw spirit to a blend.

"WHITE HORSE" is a whisky without a bite or kick, and which fits perfectly each occasion and every mood.

Tidewater Molybdenum Looking Good For Dalhousie—Utility Has Good Property In Tiger—Premier Active North of Kamloops

The Dalhousie Mining Co., which is developing the Tidewater Molybdenum property at Alice Arm with such success, is continuing driving the main drift. This drift is being driven on a full face of ore and crosscuts show it to be ten feet wide. The ore body is very persistent and the future outlook for the property is said to be very bright. A trial shipment of two tons of ore will be made immediately to the Department of Mines at Ottawa. These two tons will be treated in the laboratories of the department so that the best type of concentrating mill may be decided upon. It is planned by the Dalhousie Co. to instal a mill on the property next spring and every precaution is being taken so that the most suitable type of mill may be put in. From present appearances, Tidewater Molybdenum should be on a producing basis in the near future. When this event occurs, it will be the first molybdenum producing mine in Canada. The operation of the Tidewater Molybdenum on a producing basis will be a great asset to the mining industry of the Alice Arm district. Owing to the close proximity of the property to tidewater, cheap water transportation is assured and the property will be in a position to produce metal very cheaply.

During the past three years considerabl development work has been carried out by the Utility Mines Ltd. on the Tiger property, which mine the company has now purchased completely. Some good bodies of ore have been discovered on three levels. Owing to the low price of silver, work on the property was suspended last fall but the final purchase payment being made indicates that work will be resumed just as soon as silver prices become high enough. The Tiger adjoins the Toric on the north and contains much high grade silver ore. The original owner was Ed. Pickett who staked it in 1915.

Premier Gold Mining Co. is pushing exploration work on the Lakeview group on Ollie Mountain, 60 miles up the North Thompson River from Kamloops. Stripping and open cutting have disclosed a mineralized zone forty to fifty feet wide in which a band of heavy sulphide-arsenic ore assays from $80 to $130 per ton in gold has been found. On either side of this band stringers and lenses of ore occur.

At Curzon's—Sensible underwear and shirts for men's gifts.

Twenty Years Ago

In Prince Rupert

December 22, 1910

Weather conditions have forced the discontinuation of ballasting operations on Grand Trunk Pacific Railway construction until spring. Meantime, the men are erecting snowsheds and building bridges so that work may be facilitated on resumption of roadbed construction in the spring.

In the height of a gale, a blaze broke out this morning in the Windsor Hotel owned by Maurice Bondeau. Two hours work by the fire department under Chief McInnis resulted in the blaze being brought under control. The whole building was threatened for a time with destruction.

In order to give an account of their stewardship and answer alleged slanderous statements that have been made against them, Mayor Stork and members of the city council have called a public meeting to be held in the Empress Theatre.
