OES your estate amount to ten times your income?

If so you have made unusually good provision for the future. You have assured yourself and family of an income equal to one-half your present earnings.

Suppose, for example, that you earn \$3,000 a year . . . and your estate is ten times that, or \$30,000. This total at five per cent. interest will yield \$1,500 a year. Sufficient, perhaps, to make it possible for you to live independently

in your old age. Sufficient, too, to enable your wife and family to "carry on" if they are left alone.

If your estate does not measure up to this standard, the simplest and quickest way of bringing it up to requirements is through Life Insurance. Millions of people have built estates "on the installment plan" with the aid of Life Insurance. And in so doing they have safeguarded the future for themselves and those whom they hold most dear.

Ask your Life Insurance Representative to explain to you the many advantages of an estate founded on Life Insurance.
