## Grains of Wheat and Rice Shot from Huge Guns

To make them twice as delicious . . . twice as digestible

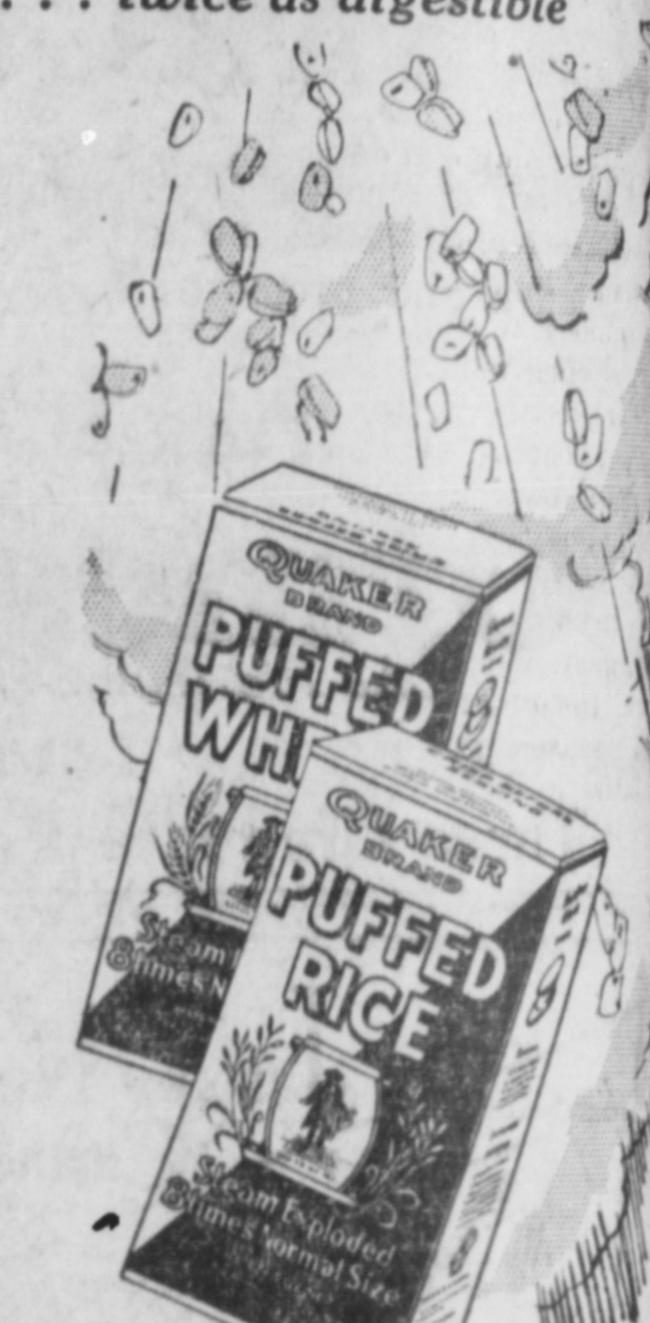

How exploding 125 million food cells makes Puffed Wheat and Puffed Rice as nourishing as hot cooked cereals.

TAVE you tasted this utterly different kind of L cereal ... Puffed Wheat and Puffed Rice ... the crispest, crunchiest cereal on the market today?

Puffed Wheat and Puffed Rice are different because they're made differently. Choice full-flavored grains of wheat and rice are sealed in huge bronze guns. Then revolved in fiery ovens. This expands the natural moisture in the millions of tiny food cells. Then the guns are fired. Causing 125 million explosions in every grain.

Every tiny food cell is blasted open. The grains are made as completely digestible as though they had been cooked for hours. Hence Puffed Wheat and Puffed Rice are virtually as nourishing as hot cooked cereals.

These grains 'shot from guns' become 8 times normal size. They have all the buttery crispness of fresh toast. They taste like sweet new nut-meats. Never before was rich grain nourishment made so delectably good to eat. Order Puffed Wheat and Puffed Rice from your grocer today. The Quaker Oats Company.
