

THE reason that Fire Insurance Companies insure your property so cheaply is because they have a great number of properties insured in a great many localities in many different cities. Thus their risks are subject to the law of averages. The individual who carries his own risk (in other words does not have his property insured) cannot possibly so diversify and scatter his risks as to bring the law of averages to apply to his property. Therefore the insurance companies can carry your risk cheaper than you can. **H. G. HELGERSON, LTD.**, are writing insurance carefully and in thoroughly reputable companies. Phone 96 and we will be glad to quote you the rate on your risk.

High Cost of Living vs. Low Cost of Insurance

Midst all the increasing cost of living there's one thing that hasn't advanced—that's the cost of Mutual Life of Canada Policies. In fact, a Mutual policy today requires no greater investment than a similar policy taken at a corresponding age a dozen years ago.

And the fact that the dividends to policyholders in Canada's only Mutual Life Ins. Co. have shown a gradual increase since the Company's inception makes the investment more attractive now than ever before.

Would you care to know the profit returns being made this year to Mutual Policies?

"Rexall Remedies"

A name that all America has learnt to
know and rely upon

"Rexall Remedies" are successful because of
the high standard of quality that is rigidly
maintained in compounding formulas based
on proven principles. Confidence has been
established because of the conservative claims
made.

"Rexall" does not in any sense stand for
"Cure-all." Instead there is a nature-aiding
preparation for every human ill. "Rexall
Remedies" do not contain harmful stimulants
or habit forming drugs.
