SPORT CHAT

Jimmy Collins of Rochester was the champion batter of the International League during the 1930 season, figures which have just been issued by the Associated Press show. Collins' average was .376. Rochester incidentally led for club batting with a team average of .329. Joe Hauser of Baltimore was leading first baseman; Walter Gautreau of Montreal, leading second baseman; Nolen Richardson of Toronto, leading third baseman; William Urbanski of Montreal, leading shortstop; Clayton Sheady of Montreal, leading outfielder; Martin Griffin of Montreal, leading pitcher in fielding, and Charles Hargreaves of Buffalo-Newark, leading catcher. Toronto led in club fielding, Joe Beley of Rochester led the pitchers for lowest average of earned runs.

A good game of hockey was played in Prince George last week between the Prince George and Vanderhoof teams, which resulted in a win for the Prince George boys by five goals to two. The Vanderhoof team did very well indeed, considering they had not had nearly sufficient practice to enter a contest. They were going to have a return game on the Vanderhoof ice when it was expected a more even match would be staged. On the trip to Prince George the Vanderhoof team was under the management of Bert Black.

ELK SEEM THRIVING

Experiment With These Animals on Queen Charlotte Islands Proving Successful

Elk, which were placed last year on Graham Island, continue to thrive, according to word received at offices of the game department here.

Last March, six cows and two bulls were liberated at Queen Charlotte City. One of the cows was drowned but the remaining five all delivered calves. In the fall, ten more cows from Penticton, all in calf, were placed on the island. The total elk population on the Queen Charlottes is now placed at 22 with the probability of further natural increase in the near future.

The elk are reported to be herding around Yacoun Lake which is situated among the mountains in the centre of Graham Island. Next year, it is expected another lot of elk will be placed on the islands. This should prove sufficient to stock the islands well with these species within a few years.
