

# \$9,000 Mystery

Solve the mystery. Eight missing figures will do it. Fill in the blank spaces above with the numbers 1 to 9 so that the total will be 15 when added in every direction—up and down, crossways and diagonally. No number can be used more than once.

Be prompt! Mail your answer NOW—don't delay—and you will be eligible for this big opportunity.

## \$9,000 TO BE GIVEN AWAY

I am offering the first prize winner THREE THOUSAND FIVE HUNDRED DOLLARS, including \$1,000.00 for promptness as a part of this Big Cash Distribution. In this contest I will distribute \$9,000.00 in Prizes to celebrate the expansion of our great magazine into Eastern Canada. Second winner gets \$1,500.00; Third winner \$1,000.00, and a score of other prizes. "BE A BIG WINNER. Someone is going to win. Why not you?" Use the Answer Coupon below. Fill in your name and complete address and mail it today.

## WHEN CHILDREN CRY

CHILDREN often cry for no apparent reason. Many times we can't guess what is wrong. The crying may mean a touch of colic; the little bowels may be sluggish—or some other upset. It may mean any of the common little ailments that children suffer. To bring quick comfort to your little one, give a few drops of Castoria. Most upsets of children are soon soothed away by this pleasant-tasting remedy that children all love.

In five million modern homes, Castoria is a mother's first thought when a child is out of sorts, feverish, cross, doesn't eat right or sleep right. When bad breath, coated tongue, or languor tells of constipation. These five million wise mothers know that children should never be given stronger medicines meant for the fully developed systems of grown-ups. Castoria is gentle—safe, yet always thorough and effective for a child of any age. It may be given to the tiniest infant for any little upset. When buying, look for the signature of Chas. H. Fletcher on wrapper.

## WATERFRONT WHIFFS

### Good Progress on Building of Road to New Floats; Fisheries Commission Makes Report; Biological Staff Busy

Good progress is being made by city relief workers on the building of the road which will connect the city up with the new fishermen's floats just east of the dry dock. The route is from Sixth Avenue down the east side of Hays Creek and across the railway tracks to the floats. When completed it will be a very busy thoroughfare, especially when the fishing season is on. The recent installation of electric lights and telephone has helped to enhance the up-to-dateness and popularity of the floats. Incidentally, more boats are today moored there than at any time since the floats were completed and put in use over a year ago.

#### Report Is Issued

The International Fisheries Commission, which will hold a session in Prince Rupert before the end of this month, has just issued its first report upon its work under the terms of the convention of 1924 between the United States and Great Britain for the preservation of the halibut fishery of the North Pacific Ocean. After sections referring to the researches in connection with the halibut fishery which have been carried out by the commission and to the necessity of further conservation measures, the commission announces five recommendations it has made with the ends of conservation in view and explains in some detail the nature and necessity of the recommendation. Briefly summarized the recommendations are as follows:

It is recommended that power be given proper governmental authorities:

- (a) To establish areas, within each of which, if deemed necessary for the preservation of the fishery there, the total catch of halibut may be reduced by a predetermined percentage annually, commencing not less than one year after the putting into force of this recommendation, until the fishery therein shall reach a state of stability of yield.

- (b) To determine upon the amount of this percentage reduction, and to revise the same from time to time as may be found necessary, the intent being to restrain any increase in the amount of fishing within such area.

- To close permanently to all fishing the two areas herewith defined (Timbered Islet and Massett) and known to be populated by small, immature halibut, and to close such other grounds as may be found by the commission to be populated by a similar class of fish.

- To prevent the use of any fishing gear deemed unduly destructive.

- To extend the present closed season by two weeks at its beginning, making the closure for all fishing in all areas from November 1 to February 15, both dates inclusive, and to facilitate future alterations in the length of the closed season.

5. To license all vessels fishing for halibut in treaty waters, under such terms as are necessary for the purpose of the treaty, including statistical returns, and for clearance to regulated waters.

At the fifth annual conference of the Pacific Coast scientific workers of the Biological Board of Canada, held at Nanaimo biological station this fall, many papers of interest were read. Among these were the following: "The Sinking of Nets by the Naas River Mud," by Dr. W. H. Martin; "The Discoloration of Halibut and Its Prevention," "Marine Bacteria, Some Physiological Reactions," "The Effect of Fresh River Water on the Distribution of Marine Bacteria" and "The Effluent From Pilchard Reduction Plants as a Fertilizer," by Dr. R. H. Bedford; "The Dehydrating Effect of an Improved Jacketed Cold Storage Room," and "The Relation Between the Area of the Cooling Coils and Temperature and the Effect on Dehydration," by O. C. Young; "The Composition, Refining and Vitamin Content of Some of B. C. Fish Oils," by H. N. Brocklesby; "The Hydrogenation of Pilchard Oil," by Frank Chamley; "Protective Coatings From Pilchard Oil," by O. F. Dentstedt, and "The Chemical Composition of Pilchard Plant Effluents," by Peter Black.

A report by Andrew L. Pritchard upon pink salmon investigations in British Columbia, specifically at Massett Inlet, has been issued by the Biological Board of Canada. Massett Inlet, Dr. Pritchard explains, was chosen as the area for the study because of the consistent excellent run and its more or less isolated location. After telling of work and experiments which has already been done, "Dr. Pritchard concludes his report as follows: "At the present time an eyeing station is under construction at McClintock Creek. One million eggs are being taken on the Tleil River on the east coast of Graham Island to fill it. The plans are to plant fry in an effort to check the feasibility of building up a run in the "off" year. Some of the fry will be marked to make identification of the returning migrants certain.

B. E. Bailey, a graduate of the University of British Columbia, formerly of the scientific staff of the Canadian Fishing Co., has joined the staff of the Prince Rupert Fisheries Experimental Station to assist in an investigation concerning the nutritive value of canned salmon.

The annual convention at the first of the week of the Northern B. C. Salmon Fishermen's Association was the outstanding event of interest during the past few days as far as local marine life was concerned. The association considered a number of important matters during the course of its two-day session and, judging from the thoroughness of the discussions, it is fully alive to the needs and feelings of this important operating end of the industry. One of the important decisions was that to change the name of the body to the "Northern B. C. Fishermen's Association," and throw its membership open to all classes of fishermen. This should tend to make the organization much stronger than it has been so far. Resolutions condemning the plan of the province to collect one per cent surtax on fishermen's earnings and the British Columbia arbitration system in fisheries disputes were interesting. Both matters are very grievous ones and topics upon which the fishermen, and a good many citizens generally, hold very strong views. The decision of the association not to espouse the cause of any political party may prove disappointing in some political circles.

**Doc Has Birthday**  
Another year rests lightly upon our good old friend Doc Clapperton who, believe it or not, celebrated his seventy-second birthday yesterday amid the best wishes of his leg-

gion of friends. The occasion was observed with fitting pomp and ceremony even if the Princess Mary did come in to spoil the afternoon while the Princess Norah marred the "morning after" today. However, as Doc would say, it's all in a day's work when one happens to be assistant wharfinger at the Government Wharf, so what's the use? It gives us pleasure to add our voice to the congratulations and best wishes which were tendered.

The Massett Cannery cannery tender Jedway, with Capt. Johnny Hartlin in command, left yesterday morning for the north, taking Olof Hanson, M. P. for Skeena, on a visit to his constituents at Stewart, Premier. Anyox and Alice Arm. Accompanying Mr. Hanson was a party of friends including M. P. McCaffery, John Dybhavn, H. F. Pullen and J. H. Pillsbury. They expect to return home about the middle of next week.

For the 1931 season up to the end of September, halibut landings on the Pacific Coast totalled 38,154,279 pounds as compared with 41,651,193 for the corresponding period last year, according to a report which has been issued by the United States Bureau of Fisheries. The total for American vessels was 31,109,339 pounds as against 34,277,968 pounds last year, while the Canadian total was 7,044,940 pounds as compared with 7,373,225 pounds. American landings at Prince Rupert for the period referred to totalled 9,031,000 pounds as against 13,234,000 pounds last year while Canadian landings amounted to 5,714,000 pounds as compared with 6,339,000 pounds. American landings at Seattle totalled 12,812,774 or a gain over last year's 10,241,135 pounds during the corresponding period. Alaskan landings showed a loss as compared with last year: whereas Vancouver and Victoria landings were increased.

Jules Seguin sailed this morning on the Princess Norah for a trip to Juneau.

## DRAMA IS OFFERING

### "I Take This Woman" Drama of Heedless Marriage and Inescapable Love

"I Take This Woman," now showing at the Capitol Theatre is the story of a likable, easy-going westerner, and a wealthy girl, beautiful, spoiled, impetuous, caught up in a sudden whirlwind of love, who marry, struggle to make a go of it, repent, separate and find they can't stay apart.

Gary Cooper returns to the spurs and chaps for this actionful story whose setting whirls from gay-time New York to the range country of Wyoming and back again. Carole Lombard, blonde, charming, talented, is the girl. Together they make a vivid and tense story.

The picture is well acted by a superior cast, and the direction intensifies its poignant, emotional theme.

## Relief Camps Closed Down

### Workers in Terrace District Cease Their Labors

TERRACE, Nov. 14.—News was received in Terrace last week that all the relief camps in the district were to close down at once in order that the list of men employed should be scrutinized. Representations were stated to have been made to the authorities that some of the men employed were not of the class for whom the relief work was instituted, and with the reduction in the grant it was an opportune time to exclude these men from the camps.

Opinion in this district seems to favor the rotation of workers if a "very heavy reduction is compulsory.

Allister J. Matheson of Prince Rupert and William John Sanders of South Hazelton have been appointed justices of the peace, the British Columbia Gazette announces.

## A dozen wrenches, but only one pair of glasses

You wouldn't expect a mechanic to do all his work with only a single monkey-wrench. He would have to keep adjusting the wrench to the size of every bolt.

Yet you ask your eyes to do a monkey-wrench job, screwing them up tight for near work, opening them out for distant work.

Golf or tennis in the blinding sun; night driving against the glare of headlights; reading; figuring; needlework; bridge — all put different strains upon your eyes and may possibly call for different glasses.

Let us make an Occupational Analysis of your eyes and adapt your glasses to your daily needs.
