> SUMMER HOMES should have this FIRE PROTECTION

> TAR from every hope of aid if a blaze takes I hold, the inflammable construction of the average summer home makes it a source of danger and anxiety.

> Minimize the fire hazard by lining inside walls and ceilings with inexpensive Gyproc Wallboard that does not burn.

> This building material is made from gypsum rock into sheets 4 to 10 feet long, 4 feet wide and 3/8 of an inch thick. It nails and cuts as easily as lumber and with minimum waste.

> Find out from your dealer how inexpensive Gyproc is; how easy to erect. Ask him for full information about its application or request a
