

SAVE YOUR SIGHT

EYESIGHT—The most valuable of all the senses—is the most neglected and the least understood. Many suffer from ill, which, upon examination, can be traced directly to defective eyesight.

THE removal of the cause will often restore the delicate and run-down sufferer to robust health. When glasses are properly prescribed, they restore the vision to normal and eliminate all eye strain.

ALICE ARM AND STEWART MINES

Major Davis and E. E. Campbell Give Interesting Addresses on Districts at Vancouver Convention.

HEAVY VALUES THERE IN HIGH GRADE ORES

On Thursday last two very interesting addresses were delivered before the convention of the British Columbia Mining Institute in Vancouver. These were made by Major Angus W. Davis, superintendent of the Dolly Varden mine at Alice Arm and E. E. Campbell, mine superintendent at Anyox. Dealing with mining fields that have attracted world-wide attention during the past season and are of local interest being so close to Prince Rupert they will be of particular value to local people.

Dolly Varden.
Major Davis delivered a very informative address on the Dolly Varden Mine, the phenomenon of the Alice Arm district, the history of which has been so troubled and stormy, but which was finally placed on a firm basis as a steady shipper by the Taylor Mining Co. last August when they completed the last mile and a half of the Dolly Varden Mines Railroad. Since that time the mine had shipped 6,500 tons of high-grade ore some of it running into the thousands of dollars per ton. Operations would take place as far as possible into the winter but it was not expected that shipping could be carried on right through. In the spring a new and more extensive scale of operations would be adopted. The ore was of a richly high grade character and it was believed, of a secondary origin. Only this highest grade ore was being shipped this season, the poorer, being left until milling operations could be commenced.

Stewart District.
Voted one of the most interesting of the convention, was the paper read by E. E. Campbell, of Anyox. It was entitled "Mineral Developments in the Stewart District," and grasped the situation in that district very intelligently. The Salmon River district was receiving the most attention and publicity now because the most recent high grade discoveries had been made in that vicinity. The general structure of the mineral region was dealt with at length. Mr. Campbell, who made frequent reference to well known mineral groups which have given evidence of being very rich in high grade values. Usually the northern prospector has to deal with low grade ores, but the making of rich finds in the Stewart district has stimulated prospecting to a great extent. If a substantial tonnage can be guaranteed the district offers no hindrances to successful mine development and operation as there are no great obstacles to railroad construction and road building. The ore of the district is complex and would offer great scope to assayers and engineers in discovering processes for its smelting.

In the Letter Box

WHY NOT ORATORIO?

To the Editor,—
Will you permit me to point out what I consider to be a slight lack of good taste in the last two concerts at the Westholme Theatre. Admitting that the time has gone by, perhaps happily so, when music can be rigidly divided into sacred and secular, and further admitting that those in charge of these concerts do not aim at putting on a religious service; is there any real value in absolutely ignoring traditions enjoyed by many and a class of music appreciated by all?

With all the wealth of Oratorio that is possessed by the musical world and with all the sacred music that cannot be classed in any way as secular, why not be all things to all classes and at least acknowledge the support and presence of those by whom such music is greatly appreciated?
T. H. NUTTALL.

Steel Striker Shot.
(Special via G. F. P. Telegrams.)
WHEELING, Dec. 1.—One steel striker was shot to death and several were injured in a clash with the authorities at Benwood.

SKEENA LAND RECORDING DIVISION. DISTRICT OF QUEEN CHARLOTTE ISLANDS.

TAKE NOTICE that William J. Leary of Skidegate, B. C., settler, intends to apply for a license to prospect for coal and petroleum on and under the following described lands:—
Commencing at a post planted twenty chains east of the north-east corner of DL 511, thence east 80 chains, thence north 80 chains, thence east 80 chains, thence south 80 chains, to point of commencement.
Dated this 23rd day of October, 1919.

How to Foil Wind and Weather on Washday

From now until spring a battle that endangers health must on washday be waged with rain and sleet.

That, or drying the washing in the cellar or attic, with its attendant inconvenience and sour smells.

Of course we can not order weather to our fancy, but if you would laugh at mud and water, save your health and keep your hands and face free from chapping and roughness, telephone us.

Next, bundle up your family washing and have our driver call for it.

In our laundry your things are initiated where the mark never shows. Everything is sorted, too—table linen is washed only with table linen, hosiery with hosiery. There is no indiscriminate mixing. And it is laundered in fleecy suds of silky softness.

The weather, and the hardship of fall and winter washing need never be a source of worry. Use your telephone and let us help you.
