SPIRIT OF THE TIMES

Ramsay MacDonald intimated that it was contrary to the spirit of the times not to grant self-government to India. If the British people tried to use force they would be fighting, not only against the people of that country but against the spirit of the times.

In Prince Rupert there is a group of people that is opposed to feeding the men who are out of work. They are opposed to the spirit of the times. They must adjust their SURPLUSES views or be prepared to fight that mysterious influence which goes with development. They are out of tune with

the trend of the day. The British people have been successful in the past because they have been in accord with the spirit of the times. They have usually been fighting for freedom for the oppressed instead of against freedom. So today they will adjust their views to the growing movement toward selfgovernment in India and we should find that country, like Ireland, settling down to co-operate instead of oppose.

There is a time to fight and a time to give way. Today seems the day to give way to the popular demand which is in line with the spirit of the times.

SPENDING AT HOME

The idea of buying Canadian-made goods instead of foreign is growing throughout the country. So is the idea of buying British Columbia goods in preference to all others. To carry the scheme a little farther, why not buy goods in Prince Rupert and keep the money at home.

With the recent drop in local prices the idea of buying bushels, has been harvested. at home is gaining ground and might well be fostered to tuation during the month of De- tober 10 and November 16 last. the benefit of the city generally. When the dollar is here, cember as far as foreign statistics we have a chance of grabbing it, but when the dollar is are concerned, while the situation away it is useless to expect to get it back. Wave it fare- in Canada is covered up to the Palling Farmers, well. It will not return.

Vancouver Girl Weds Premier Man

This lows: amount is only 44,000,000 bushels greater than the quantity on hand at the same date in 1929, and offsetting this will be larger amounts Stewart. of unmerchantable grain, together with increased tonnage fed to livestock on account of the prevailing low prices."

Not Unreasonably High

The opinion is expressed that with seven months of the crop year remaining the surplus of 253,000,000 ably high. Attention is drawn to all right now after having some of the fact that the five-year average export for the seven months ending July 31 was 141,115,554 bushels, or 20,159,365 bushels per month. There has been a continued im- to belittle a political opponent. provement in the exports of wheat and wheat flour during the first five months of the crop year.

The December monthly average price for Manitoba Northern cash wheat, Fort William and Port Arthur basis, was 55.6c, as compared with 64.4c in November and \$1.30 per bushel in January, 1930.

DEPARTMENT OF TRADE AND COMMERCE OTTAWA, CANADA

To Canadian Citizens, Everywhere in Canada.

Bring the Boys and Girls Back Home!

How often have we all deplored the fact that thousands upon thousands of our most promising young men and women find it necessary to leave Canada, in order to seek in some other country opportunities for the employment of their talents that seem to be lacking here?

As individuals we have deplored it, because in these cases the sorrow that is caused us through the breaking of family circles and home ties is accentuated by a sense of irrevocable loss, due to a feeling that the separation is going to be permanent. And from a broad national standpoint we have deplored it, because it has meant a serious drain upon the very kind of population-gifted, energetic, ambitious-that we most need to help in developing our magnificent natural resources.

Must we continue to rear and educate our children-to equip them as best we can for the successful careers we hope will be theirs—only to lose them to an alien flag because of the dearth of opportunity for them at home?

Opportunity of any kind is a result, of which production of some kind is always the cause. Most people create their opportunity by engaging directly in some form of production, such as farming, fishing, mining, lumbering or manufacturing. These people provide the foundation and, according as they succeed, opportunity is created for others in all the occupations that constitute the super-structure, such as transportation, banking, insurance, trading, the professions and public service.

The more the people of a country favor their own producers, thus giving the latter all the incentive necessary to increase the volume and broaden the scope of their production, the more abundant will be the immediate opportunities they create for themselves, and the future opportunities they create for their children.

If in the past opportunity has not been as abundant in Canada as it has been elsewhere, it is because Canadian producers as a class have not been as successful as producers elsewhere have been. And the chief reason our producers have been less successful is because they have failed to receive from Canadian citizens generally the same loyal support that the producers in certain other countries have received from their citizens.

Some of these countries import practically nothing that they are capable of producing for themselves. But we Canadians are so careless about our daily buying, so thoughtless of the welfare of our producers, so shortsighted about keeping the door of opportunity open for our sons and daughters, that every working day we allow ourselves to be sold about \$2,500,000 worth of imported merchandise that our own producers would have been glad to make for us, if we had only given them the chance!

Why not let us all resolve that from now on we'll try to bring our boys and girls back home by remembering, in our buying, that it must always be "Canada First"!

Very sincerely yours,

Minister of Trade and Commerce.
