FISHING SEASON ENDS

In view of the conditions of the fishing industry, Prince Rupert is to be congratulated on the fact that conditions are no worse. Fishermen have suffered badly and the owners of boats have received scarcely enough to keep them in fishing condition. Now there is a close season for three and a half months and it looks as if the men would have a difficult time getting through the winter.

The chief reason for the small catch is primarily the low prices but also it will be remembered that owing to several reasons fishing did not commence very early in the season. The main interest in Prince Rupert is not how much fish is caught but how much do the fishermen receive for their

MEN LAID OFF ON HIGHWAY

The laying off of the men on the highway work came as rather a shock but in view of the financial situation it is not surprising. Before any of them are taken back it is probable that the provincial and federal governments will Education is the fundamental so- to become effective. want to satisfy themselves that all the men working are really in need of the employment.

While the action seems erratic and tending to destroy confidence it is hoped that very soon the difficulties will be ironed out and as many as possible of the men be taken back to work. In the meantime it is understood they are being taken care of by the government in the camps.

P. G. E. SCHEME QUASHED

The P. G. E. scheme seems to have been quashed for the present and by the time the present winter is over both governments will be so hard up it is hardly likely either will bia University, on his advocacy of Sanders, C.N.R. have the hardihood to revive it. ALCOHOL IS RELIC

Dr. Cherrington, Dry Executive, Says It Has No Place in Medern Machine Era

BOSTON, Mass., November 2-A whole new steup confronts temperance workers, calling for shockproof sticking to the one fundamental point that alcohol as a part of beverages has no more place in modern machine civilization than sand in the bearings of engines.

setts Anti-Saloon League.

sent to board a train tonight for work. New York if he knew that the encalled moderate amounts:

No Longer Concerned kard. We are confronted with a prothat which obtained 50 years ago, or Monday Nov. 2, 1931 drug. Its use as a beverage belongs to a slower and lower type of civilization than ours. This is the message that temperance workers must

> Dr. Cherrington warned that behind all attempts to modify the suggestion" that liquor, for the first time in history, be given sanction in the Constitution of the United States, as slavery was at one time. Any modification would be in effect government permission for the liquor traffic, he explained.

get across to the public."

Taking a long view, Dr. Cherrington expressed satisfaction with the progress of the temperance movement. Present reaction against it is against the decades and centuries, he said. It took 10 to 12 centuries for the prohibition of murder to become even partially effective. There is two Premier subsidiaries, are very no cause for discouragement if, af- rich in silver and although they ter 12 years, prohibition of intoxica- are at present closed down, they ting liquors is arousing opposition would be opened immediately if an

in the United States, he added. lution of the liquor problem, but education without law to back it up is feeble, Dr. Cherrington continued. Even the public school system had to be legislated and enforced before it won acceptance by the public. Unflinching adherence to the Eighteenth Amendment, plus an enlightened and continuing educational campaign is the course for dry work-

ers to pursue, he concluded. Takes Issue With Butler

Ben Spence of Toronto, a journalist and student of liquor systems. took direct issue with Dr. Nicholas N. Chamoux, Terrace; H. Franks Murray Butler, president of Colum- Woodcock; W. A. King city; W. A.

"Dr. Butler opposes return of the saloon," Mr. Spence said. "He states loon. The only difference is the name, and the absence of a bar and brass rail. But Canadian "beer parlors" are only saloons, after all. Al- and J. Patrick, C.N.R. coholic beverages are sold and imbibed on the premises, and that's a saloon. In intelelctual honesty, Dr. Butler cannot favor the Canadian system for the United States if he opposes the saloon."

Even if the Canadian system had not increased the consmption of absolute alcohol contained in spirits, wine and beer from 2,551,000 gallons in 1923, to 5,240,000 in 1930, it still would not promote sobriety in the United States, Mr. Spence continued. Canadian courts and legal machinery are more strict, yet bootlegging, crime, and liquor consumption have steadily mounted. With the looser methods in the United States, the results would be corres-

pondingly worse. Mr. Spence denied the claim that prohibition has increased crime in the United States. Without it, he said, conditions would be far more

In 1880 there were in the United States 2,647,000 women gainfully employed. In 1930 women workers had increased to 10, 779,000.

EFFICIENT DIETICIAN

Meals Must Be Appetizing and Attractive as Well as Economical, Says Hospital Expert

TORONTO, Nov. 2:-- If food comes back on the tray untouched, a dietician has not fulfilled her duty, Dr. Malcolm T. MacEachern, director of hospital services, American College of Surgeons, told the dietetic section. Meals in a hospital should be so appetizing and attractively prepared that there is no waste whatever. It is not sufficient that the food values have been carefully calculated, he said.

Furthermore, a hospital dietician should have administrative and business ability. In fact, Dr. Mac-Hachern described her as a "super Hallowe'en went off very quietly woman." So complicated are the in the city Saturday night. The duties of a hospital dietician that in college and she regretted that suffer from piliousness or indigestion there is nothing better than
