

Heart and Nerves So Bad Was Unable To Sleep For Hours

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Miss Theresa M. Ravary, Gallington, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

RUSH FOR PLATINUM

Excitement Grows at Edson; Many Citizens Leave For Scene

SAMPLES EXPECTED

Those at Scene of Discovery Express Great Confidence

EDMONTON, April 1 — With excitement growing to a more feverish pitch, Edson's platinum rush to Obed, 40 miles west of that town, is continuing in full swing, with 120 claims staked on Monday and 80 more up to noon on Tuesday.

While the rush continues, no samples for assay have been received by the provincial analyst or the University of Alberta, despite rumors in the Edson district that the university has assayed the ore. Samples, however, are expected within the next 24 hours.

G. Dolan, Edmonton, who found the platinum claim, arrived back in the city on Tuesday morning, but has little for newspapermen. On Tuesday afternoon he went over to the University of Alberta to see Dr. J. A. Allan, to get information as to the glacial history of the find.

Easy For Edsonites

The rush for riches is far afield from the old-time Klondike drives or even the more recent rush into a reported strike area in the south of the province. Edson residents simply are jumping into their cars, bouncing across 40 miles of Jasper highway, parking their machines and staking their claims. Then they can turn around and go back to Edson—making a little trip that requires, for the stomach's sake, only a few sandwiches and a flash of coffee; mighty different from the days of frying pans and salt pork.

The scene of the reported find of platinum is on Sullivan Creek about five miles west of Obed, at a point where it intersects the highway. The roadway cuts across the

stream three miles up from its mouth with the Athabaska river and claims are being staked on either side of the highway.

Express Confidence

Those experienced in the ways of ores are reported to be showing great confidence in the value of the platinum findings. Dr. J. A. Allan, head of the department of geology at the University of Alberta, declares, however, that while the platinum indications in the glacial gravels which cover the entire district in which Obed and Sullivan Creek are located, there is likelihood that there have been concentration sufficient to make the ore value up to \$1,100 per ton, as enthusiasts claim. He is anxious to get samples.

Postmaster Carmichael at Obed indicated to stakers on Monday that he has great confidence in the discovery.

A. E. McDonald, superintendent of the Edson division of the Canadian National railways, is reported to have gone to the scene of the find to investigate on behalf of the railway.

Tell of Excitement

Arrivals in Edmonton tell of the excitement prevailing and the rush to the scene of the find.

"The road was crowded on Monday with cars taking people in to stake," said one visitor. "They are coming from miles around and feel certain that they have a rich placer mining area."

Most of the staking is on what is commonly known as Sullivan Creek, which is crossed by the Jasper highway. It is reported that claims have been staked all the way to the Athabaska river.

Parties have arrived in the city to file upon claims staked last Sunday, the day before the rush. They have found that the original location claim must first be filed upon as future entries will be numbered accordingly. As a result, it will be necessary for a surveyor to leave for the field at once to locate the original claim of William Erwin and Jerry Dolan. Parties have ten days to file from the time their claim, which is some 20 acres in area, is staked.

NEWS OF THE MINES AROUND PRINCE RUPERT

Dalhousie Meeting With Success in Tidewater
Molybdenum—Independence May Reopen
Soon—Prosperity Doing Well

The Dalhousie Mining Co., it is reported, is still meeting with unusual success in the development of the Tidewater Molybdenum property, a short distance down the inlet from the town of Alice Arm. Development work at the present time is being concentrated on a raise from the lower level to the upper and extension of the upper drift. Work has been suspended on the extension of lower drift, this being caused by the fact that more ventilation is needed. It was therefore decided to drive a raise to the upper drift. When this raise has been completed, the lower drift will be continued until it has cut through the whole series of ore bodies, thus giving a great depth on them. This lower drift has been driven in ore throughout its entire length which is very encouraging. The raise is also being driven in ore and the extension of the upper tunnel shows that, as greater depth is obtained, the ore becomes richer. Development work which has so far been done indicates that the Tidewater Molybdenum may, in

the near future, become a steady producer.

A. St. Claire Brindle, well known throughout the north as a mining engineer, addressing the British Columbia Chamber of Mines in Vancouver recently, advocated free airplane transportation for prospectors to remote areas in the north to facilitate the search for gold.

S. P. Fitzgerald, who returned to

Stewart last week after spending the winter in the south, is very enthusiastic about the future of the Portland Canal district. As soon as the stabilization of silver is accomplished, he is confident that there will be ample funds available for mining. As far as the Independence property was concerned, Mr. Fitzgerald stated that some assessment work was to be carried on now with the possibility that regular operations might be resumed before the end of the year.

R. S. Watson, representing the Consolidated Mining & Smelting Co., has started off recently from Vanderhoof for the Nation River mining area in the interest of his company.

"It is with a very great deal of satisfaction that I can report a very highly successful year for the Prosperity Mine Syndicate under the efficient management of the Premier Gold Mining Co.," stated George A. Mehfield, president at the recent annual meeting of the Prosperity Syndicate in Victoria. "The Prosperity has made a remarkable record for the fourteen months of production to January 1, 1931, and this in face of severe climatic conditions and the constant-

ly declining price of silver. Since taking over the management of this property, Premier has advanced for development \$139,025; additional claims, \$4,100; mine equipment, \$50,629.01; material and supplies on hand, \$11,036.08. During this development there has been a charge for interest of \$23,648.04. Now I am able to report that during this short fourteen months of production these charges have been paid off with the exception of \$33,827.64 while to offset this balance due, we have a credit of \$65,755.09 which is the total of uncollected proceeds of ore sales, ore in bunkers, plant and equipment, supplies on hand and additional property, leaving a credit of \$32,428.03 and, in addition to this, we have piled at the beach several thousand tons of silver ore with content of about 20 ounces which would make a nice asset with higher price for silver. The mining and tram cost of this is all paid. During the fourteen months a total of 20,852.41 wet tons were mined and shipped to smelter, contents of which were 412.25 ounces of gold and 1,546,298.9 ounces of silver with gross smelter value of \$575,876.68 or \$29.33 per ton. The production cost was \$362,189.34 or \$18.45 per ton, leaving a net profit of \$213,687.34 or \$10.88 per ton

One very important factor in the development of the property has been the recently increasing gold content of the ore, having practically doubled in January shipments.

WHO'S WHO

Hon. O. P. Goucher

NOVA SCOTIA has as its Minister of Natural Resources Hon. O. P. Goucher, who has been closely identified with agricultural work for many years. He is also chairman of the Nova Scotia Committee of the World's Grain Exhibition and Conference.

Born in Annapolis County in 1865, Mr. Goucher graduated from the public and high schools and finished off his education at the Truro Normal School. For four years he was principal of the Lawrenceton High School and for another six years acted in similar capacity at the Middleton High School.

Entering commercial life in 1902 he became associated with the Manufacturers' Life organization and in 1925 assumed the general management of the company for the Province of Nova Scotia.

Mr. Goucher was elected to the Nova Scotia Legislature in 1925, and was called upon to enter the Government in 1930, taking the portfolio of natural resources.

For a number of years he was closely associated with the fruit growing industry of his Province, owning and supervising an apple orchard of considerable size in the heart of the Annapolis Valley.
