### Monster Locomotives Are Placed On Kamloops- Jasper Run

VANCOUVER, Jan. 2.—Announcement is made here by B. T. Chappell, general superintendent, Canadian National Railways, that two new passenger engines have just been placed in service between Kamloops and Jasper. They are of the 6000 class and are the largest passenger engines of the Mountain type operating in British Columbia. They will operate over two divisions, a distance of 275 miles, in handling the Continental Limited, crossing the summits of both the Albrede and Rocky Mountain ranges.

These engines are 92 feet in length over all and weigh 627,000 pounds, in working order. They operate on a steam pressure of 250 pounds to the square inch. They have four pair of drivers with 73-inch drivers.

This type of engine is now used for company passenger trains from Kamloops to Montreal. From Winnipeg to Edmonton, a distance of 300 miles, it is also used on a straight run, the crews changing at divisional points. This is believed to be the longest locomotive run in Canada.

## WEATHER IN 1930

### Decidedly Bad December Gave City More Rain and Less Sunshine For Last Year

A decidedly unfavorable December, which had 15.48 inches of rain and not a single hour of sunshine, gave Prince Rupert a poorer record in 1930 than in 1929, official meteorological figures reveal. Sunshine in Prince Rupert during 1930 totalled 1,194.74 hours as compared with 1,253.3 hours in the year preceding. Rainfall for 1930 totalled 85.33 inches as against 82.45 inches in 1929. From the standpoint of temperature, 1930 was a milder year than 1929. The lowest thermometer reading for 1930 was 12 above zero in January while in 1929 the lowest reading was 8 above, also in January.
