

How Robbers Are Caught

They Leave Prints

Many robbers are identified by finger prints they leave on things they touch. If the robber is a known criminal, his prints are on file, his description and his record are there, too.

These finger prints never lie. They cannot be forged. When exhibited as above on a screen to a jury, they identify the man beyond doubt.

All finger prints are divided into four types: arches, loops, whorls and composites. The eye needs but a few minutes study to decide whether two finger prints were made by the same person or not.

Over 200,000 finger prints of known criminals are kept on file in Ottawa and the number is added to daily.

Watch Your Prints

You are not a robber, of course, but remember no one can touch anything without leaving a print. It is often a dangerous print laden with germ infections.

Hands pick up germs all day long. Often by touching things others have touched, or by shaking contaminated hands. Any piece of food you touch may carry those germs to the mouth.

Life Extension Institute lists 27 diseases which may be conveyed in this way. Colds are the most common—conveyed by hands which are used to check a sneeze or a cough.

That is a reason for Lifebuoy Soap—a germicidal soap. It either kills germs or makes them inactive. Wash your hands with Lifebuoy often, and always before a meal. See that your children do it. Otherwise, you

are sure to convey germs to the mouth, where they breed.

Also Fights Odours

Lifebuoy Soap also kills body odours. Use it in a bath, and you are safe for hours. No perfume in it, but a germicide—a mild, refreshing scent of safety that disappears in a few minutes. Yet Lifebuoy is also a dainty soap, based on two palm oils. No beauty soap was ever created to do more for the skin and complexion.

Millions of people, the world over, are protecting themselves in this delightful way. They get all the joys of an exquisite soap, with all this protection added. You will join these millions when you know Lifebuoy.

Make it easy for the family to benefit day-in-day-out by Lifebuoy's protection. Keep a cake at the wash basin and the bath. Ask your dealer today for Lifebuoy.

The second fire alarm in one day aroused the residents very thoroughly on Friday night shortly after eight o'clock. Just at the time Dr. Mandy was lecturing to an audience of about 120 in the theatre. With the sound of the siren his hearers melted away as by magic. FEEL MEAN?

Don't be helpless when you suddenly get a headache. Reach in your pocket for immediate relief. If you haven't any Aspirin with you, get some at the first drugstore you come to. Take a tablet or two and be rid of the pain. Take promptly. Nothing is gained by waiting to see if the pain will leave of its own accord. It may grow worse! Why postpone relief? There are many times when Aspirin tablets will "save the

day." They will always ease a throbbing head. Quiet a grumbling tooth. Relieve nagging pains of neuralgia or neuritis. Or check a sudden cold. Even rheumatism has lost its terrors for those who have learned to depend on these tablets. Gargle with Aspirin tablets at the first suspicion of sore throat, and reduce the infection. Look for Aspirin on the box—and the word Genuine in red. Genuine Aspirin tablets do not depress the heart.
