Advice to Scrap Politics Given to Women of Quebec

MONTREAL, Nov. 3.—Women of Quebec were urged to scrap politics and spend their time working for the poor instead by speakers at the inaugural meeting of the Liberal L. O. David Club for Women held here recently.

The club was formally opened by the Hon. L. A. David, Provincial Secretary, and son of the late Hon. L. O. David from whom the new organization takes its name. Mr. David cautioned the women not to forget in their interest in politics that they should remain women in every sense of the word, and that it was more important for them to merit the qualifying term "belles" than "good politicians."

The Hon. Fernand Rinfret declared himself in favor of votes for women in this province but asked that it be kept in mind that politics was a minor matter as compared with a relief program.

Mrs. Emile David, president of the club, in answering the speakers, said that while the women fully realized the great need for their services in the hard winter ahead, politics meant too much for them to desert the field entirely. "We shall do both," she announced.

ALLOWANCE TO REMAIN

Edmonton Hospital Board Refuses to Cut Students' Remuneration

EDMONTON, Nov. 3.—By a decisive majority, the hospital board rejected a motion that the allowances to nurses in training be cut in half in the contracts which would be offered in future to girls entering the Royal Alexandra for training.

The scale of allowances proposed provided no payment for the probation period of four months, \$5 a month for the next eight months, \$7.50 a month for the second year, and \$10 a month for the third year. The chairman pointed out that eventually this new scale would affect 150 nurses in training and save approximately \$1,000 a month. Those speaking against the motion concluded that the present allowances to the girls are little enough in compensation for the work which they do, that a cut would make it impossible for many girls to go through the nursing profession and that the present rate attracted the best type of girls and permitted a careful selection of novices resulting in increased efficiency.

Splendid Driving By Taxi Driver Wins Heiress

BEVERLY HILLS, Calif., Nov. 3.—A romantic taxicab driver has figuratively driven his way into the heart of Miss Florence A. McAllister, 18-year-old heiress to Oklahoma oil millions.

Edward Challette's expert maneuvering of a taxi in which Miss McAllister was a passenger so won her admiration she hired him as her chauffeur and later married him, according to the story just revealed by friends.

The couple has been married several weeks, but the marriage was revealed when they purchased a \$55,000 home and \$37,500 furnishings here.

Mrs. Challette is the daughter of the late Mrs. Florence McAllister, who died in 1930 leaving her estate of \$3,000,000 to three children in valuable oil lands in Oklahoma. It was reported that Mrs. Challette's annual income from her share in the lands amounted to \$240,000.

NOT CENT FOR LAZY

Model Unemployment Law Would Provide Millions, However For Workers

NEW YORK, Nov. 3.—Model law to "provide millions for employment but not a cent for loafers" is urged by Dr. Willford I. King, professor of economics at New York University.

The law proposes that state employment at low wage rates be offered to all able-bodied persons desiring it, at a suggested minimum of 30 cents an hour without food and lodging. The law further would require all employers of 50 or more persons to subscribe to an agreed volume of employment, which he must maintain under penalty of fine.

The employer also would contribute to an unemployment reserve fund kept in his own name by the state and invested in securities legal for the state's savings banks.

Dr. King emphasized the necessity of low state wage rates: "Clearly it would be folly to pay high prices for the labor of those at present unemployed. Many of them are constitutionally inefficient. Most of them would be unskilled at the tasks which the state needs to have done. Furthermore, it should not be the purpose of the state to divert them permanently from their customary fields of work.

"The pay, then, should be just sufficient to keep them from want but not enough to make them desire to retain positions with the state indefinitely.

"Experience everywhere for centuries shows that charity breaks down the morale of the recipients. Unemployment yields the same result. The aim of society should then be to eliminate both as fully as possible."

German Prince Punches Clock; Enjoys Labors

DETROIT, Nov. 3.—Punching a time clock at the Ford Motor Company plant here with other employees, Prince Louis Ferdinand von Hohenzollern, a grandson of the former Kaiser, admits he is having the time of his life. He thinks United States slang "is what you call 'hot stuff,'" professes to have no political opinions and is prouder of a doctor of philosophy degree received from the University of Berlin than he is of his title of Prince.

The youthful Prince—he is 22 years old—is endeavoring to learn industrial methods and merchandising practices here and is planning to work in every department of the automobile plant.

"I had to work darned hard for that degree," he explains in telling why he would rather be called "Doctor Louis Ferdinand" than "Prince von Hohenzollern."

Aside from admitting he is anti-militaristic, Prince Louis dodges all efforts to lead him into political discussion. He would rather discuss the relative merits of motor cars.

The Prince believes that the turn in world affairs that overthrew the Hohenzollern dynasty in Germany brought to him a sort of "new freedom." Far from being resentful, he is enjoying it, he said.

He refers to the former Kaiser either as "my grandfather" or just "the old man."

More than 15,000 patents have been awarded to women inventors in the United States.
