AGREEMENT ON RELIEF WORK

"Half a loaf is better than no bread at all," it can be at least observed as far as the negotiations between Ottawa and Victoria on unemployment relief work are concerned. Half a million dollars per month for the next four months will help a good deal and, by the end of February, it is possible there may be prospects of improvement if not actual improvement in the situation.

Meantime, it is the hope of all local people that work on the local highway may soon be resumed. Relief work or no relief work, it is reasonable to expect the government of the Skeena River por PORPOISE Highway especially during the winter season. relief work, it is reasonable to expect the government to

FISHERMEN'S CONVENTION

From the diversity of subjects that were dealt with at the two-day convention here early in the week, it is quite apparent that the Northern British Columbia Fishermen's Association is fully alive to the needs and wishes of the fishermen of this district. The spirit of many of the resolutions which were passed is heartily agreed with by citi- product worth \$125 a Gallon and zens generally and it is to be hoped that the association is successful in its efforts to improve the lot of the fishermen which is none too good these days to say the least of it.

TARIFF FOR BRITAIN

The declaration in the House of Commons in favor of the immediate putting on of protective tariffs by Rt. Hon. billties of extracting perpoise oil on Winston Churchill was not unexpected. Whether they will this coast. He thought at any rate be applied so precipitately as he suggests is another mat- it might be tested out here. ter. It is natural to suppose that the new national govern- The speaker poined out that, ment will soon take some action along this line but whether or not the action will be very far-reaching is doubtful.

The new government is pledged, however, to the policy at as high as \$125 a gallon and the of extending inter-Empire preferences and, in due course, supply was still not equal to the deaction along this line may be anticipated.

Mr. Churchill, as is well known, favors extreme action along the line of protective tariffs. The views of the national government, and possibly many of its Conservative able members, are not so extreme. Some compromise on the matter may be anticipated.

Science finds new reasons for KELLOGG'S ALL-BRAN

MILLIONS have found Kellogg's ALL-BRAN a safe way to overcome common constipation. Now science shows this delicious cereal brings three benefits to the diet: "Bulk." Vitamin B. Iron.

The "bulk" in ALL-BRAN is much like the "bulk" in lettuce -only it is concentrated in a more convenient form to relieve constipation. It absorbs moisture, forms a soft mass, which gently clears out the wastes.

Vitamin B tones the intestines, and promotes regular habits. Iron builds blood, and aids health

No wonder ALL-BRAN is considered far more natural than pills and drugs - so often habitforming. Try two tablespoonfuls daily. If you suffer from intestinal trouble not relieved this way, see your doctor.

Serve ALL-BRAN as a cereal or use in cooking. Kelluggs Recipes on the redand-green package. At all grocers. Made by Kellogg in Lon-

OBSERVING ARMISTICE DAY

Editor, Daily News:-

Terrace is in many respects a most unusual place. This year it did not observe Remembrance Day. I suppose that it was the only place in Canada, for its size, that did not observe Remembrance Day with some kind of a service in honor of the glorious dead. Apart from the short blast from the sawmill here, the eleventh might have been any other day. (Many thanks to the engineer for his kind act.)

Are the people forgetting those brave and noble men? If so, it is time that they were waking up to the fact that the glorious dead are the men who gave their lives that we may live and toil in peace. If the people are beginning to forget this, it is time that the younger genera tion took an interest in the matter and helped the people to remem-

Whatever the trouble was this year, I sincerely hope that it may be remedied, before Remembrance Day comes around again.

Pilchard Oil and Vitamin D Makes Valuable Product

Among the subjects discussed by The secretary of the school board H. N. Brocklesby at the Rotary Club was authorized at last night's board luncheon yesterday was that of memeeting to call for tenders for the dicinal oils and artificial pearls. The winter's coal supply for the schools former proved of great interest behigh will amount to an estimated cause fish oils are being used in fifty tons. Members of the board feeding poultry with good results. suggested that Telkwa be given a While pilchard oil is a drug on the market at 11c a gallon by adding an oil containing plenty of Vitamin D It was agreed at last night's school 't was being marketed today at 50c hould in future purchase electric proved just as effective as cod liver Last fall the local station discov-

ered some oils containing large amounts of Vitamin A.

Mr. Brocklesby told of the halibut mended to the United States gov- held last night in the city council the Abbett To being shipped from here for the Abbott Laboratories supplying Parke Davis Co. and suggested that a Canadian industry along these lines might be built up.

The speaker also described the making of artificial pearls which were formerly all made in France. They were glass beads covered with a pearl lustre substance taken from the scales of fish. Any fish with true scales could be used but those of the herring family were best. The bearl essence was tried near Nanaimo by Japanese but the industry was removed to the United States.

At the close of his address, the speaker was thanked by President George Munro who spoke appreciatively of the work of the Fisheries Experimental Station of which Mr. Brocklesby is the acting director.

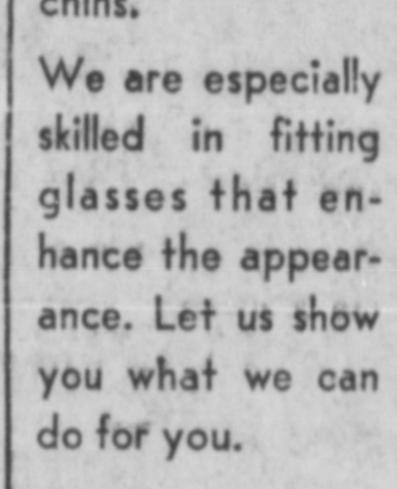

LUNCHES AT SCHOOL

There was some discussion at last night's meeting of the school board on the question of children taking their lunches to school. Mrs. School, Booth Memorial School and T. M. Spencer was opposed to the Borden Street School reported to idea of children taking lunches to the school board at its meeting last school unless it was absolutely nenight that mid-term examinations cessary, It was felt by the board, had been conducted last month, the however, that the teachers should results of which indicated that good exercise some discretion in the matprogress on the part of the pupils ter particularly on the wet fall and winter days.
