

# Pacific Milk Makes Butter

Several have asked that the recipe for making butter be repeated as they missed it. Empty 1 small tin of Pacific Milk into a saucepan. Heat it to the boiling point.

As it cools, about lukewarm, add 1/4 pound of butter. Allow this to melt. Add a pinch of salt.

Then beat it until cool and put in the refrigerator or out-of-doors to set.

# PRINCE ALBERT TAKES PREMIER ORE TO TACOMA

First Shipment From Rich Mine Since Last Spring; 225 Tons.

The "Prince Albert" sailed at 10:30 Saturday night for the south via the southern Queen Charlotte Islands. The big freighter had 225 tons of Premier gold ore valued at \$450 per ton which she brought down on her last trip from Stewart. This ore she will take to the smelter at Tacoma, being the first shipment from the Premier since last spring.

Besides her cargo of ore the "Prince Albert" took down a part cargo of fertilizer which will be discharged at Vancouver. It is expected that the "Albert" will be back by the middle of next week when she will proceed to Stewart for another cargo of the rich ore.

## MILLED MOLYBDENUM WORTH \$2,000 A TON

The discovery of the valuable application of molybdenite to the manufacture of high speed steel at Sheffield, England, of course, will give a fresh impetus to the search for this metal in British Columbia. Its concentrates were worth during the war about \$2,000 a ton in Canada, and a higher figure in the United States.

So far two main deposits in British Columbia have been described as producers, although reports of its location have been made from a number of points in various parts of the country. The two referred to are at Lost Creek, in the Nelson mining division, and at Alice Arm. Skeena mining division.

The metal, which is used chiefly in steel manufacture, is a sulphide of molybdenum, Mo. S<sub>2</sub>, which has to be concentrated to 80 or 90 per cent. in order that the product may be marketed.

With suitable concentrating mills the tonnages of low grade ore in British Columbia could be developed, and a regular production maintained.

## "PRINCE RUPERT" GONE INTO LOCAL DRYDOCK

Annual House-Cleaning of Big Vessel Commenced This Morning.

The "Prince Rupert" left the G. T. P. dock this morning shortly after 8 o'clock for the drydock where she will at once begin her annual overhaul. The ship is in sound condition at the present time and the most of the work will consist in thoroughly cleaning all sections of the big coaster. She will go on the pontoons for a few days while at the dock when the hull will be scraped and painted.

The "Prince John" arrived also on Saturday and will go into the dock for repairs, the "Prince Albert" taking her runs to Stewart and the Islands.
