## HEUMEDINO (O) CANADIAN PROGRESS

unlaboured progress, a current so deep and permanent that it cannot be stopped or even stemmed by periodic advances and recessions of business. Consider these facts about Canada's progress in the ten years,

1922-1931, inclusive:-Her total trade increased 14.75%; her population 17.75%.

Her newsprint tonnage 115%; her mineral production 24%.

The gold output more than doubled, made a record in 1930 and broke it again in 1931.

Steel production grew 23%.

AND THE RESIDENCE OF THE PARTY OF THE PARTY

Hydro-electric power arose 122%.

Life insurance in operation increased 105%.

The employment index arose 11%.

Savings bank deposits 22%, and bank debits 11%.

The true nature of this unlaboured progress of Canada in motion is revealed in the fact that dividends amounting to \$226,351,000 were paid by Canadian corporations in 1931, AN INCREASE OF \$32,500,000 over the average of the six years ending 1930 and \$50,000,000 BETTER than any year previous to 1929.

The basic forces—natural wealth and national character—are moving forward to-day as steadily as they were in 1922, and they will undoubtedly produce by 1942 beyond what men to-day do not even tape or anticipate.

> The men who march forward with Canada must think on their feel and maintain their business momentum, never losing touch with the market; never losing faith in the consumer with whom the della newspaper keeps in constant and intimate contact.
