

### Embarrassed By Pimples on Face

Mrs. O. J. Benson, Seal Cove, N.B., writes:— I was in a very nervous, rundown condition, and not able to do my own work. My face was covered with pimples

which was very annoying and embarrassing to me at times. After taking three bottles of Burdock Blood Bitters I can do my own work, and the pimples have entirely disappeared."

# RAIN GOOD

Precipitation of Last Week Bene ficial in Manitoba and Saskatehewan

WINNIPEG. June 20:-In Manitoba, the whole province was visted by one of the heaviest rains enjoyed this year, according to the Canadian National Railways crop report for last week. Precipitation ly. was heavier in the north and north western section, centering on Dauphin and the Swan River Valley where it was more required than in other districts. All southern points! ly active in some southern areas weaker undertone developed. The coast and Orient. night to supply the requirements of prices react to lower levels. farmers. The general feeling now

been experienced interspersed with cool cloudy weather and, in some of these districts, the moisture has seeped into the ground to a depth of 18 inches. Fields damaged by soil drifting have been reseeded and all

grains are now growing rapidly. In Central and Northern Saskatchewan crop conditions are good as weather has been ideal and growth is remarkably rapid on account of rains being followed by warm weaher. Wheat is stooling thickly and showing healthy even stand while coarse grains are stretching rapid-

and a number of poison bait mix- hog market is still unsettled and ing stations are working day and any bolstering of supplies makes

Saskatchewan heavy rains have n official duties.

## Progress of Peace River Block Reviewed By Canon Proctor; Need For Outlet Is Stressed

Prince Rupert is Logical Terminal, Declares Cleric-Tells Synod of Work of Anglican Church

After speaking of the size of the place and describing it as an inlet without an outlet, Rev. Canon T. D. Proctor, at the Anglican Synod Thursday night, set forth in a most interesting and entertaining manner the rapid developments which had taken place both materially and spiritually in his thirty months of residence in the Peace River Block. A point which was of great#\_\_\_\_\_-

the last ten years, were put into ef- have been established. fect. This would then cut down the Many places which were decidedly

Canon Proctor set forth the ad- veloped into real live towns, the vantages of climate, soil fertility first of which to be incorporated and mineral wealth and how the was Pouce Coupe, some six months population had increased some ago. This, however, is not the largthree hundred percent within the est for, with the entry of steel into last few years, despite the period of Dawson Creek, on January 15 a year depression. He also stated that ago, a real live centre immediately about sixty-five percent of the set- came into being. Eighteen months tlers were of Anglo-Saxon stock and ago this place was a half-section that about ninety percent of those covered with stubble, from which who had come in within the last the grain had just been removed. At three years had been successful that time there was but one small farmers on the prairies who had old log farm building. Today, on been driven out by the continued that same site, there is a town with droughts. Many who were consid- a population of over 400, with ered wealthy during the last decade buildings, including five grain elehad made their entry upon freight vators, an up-to-date station and trains without a cent to make a round house, four-roomed school, fresh start in a country which has hospital, three churches, four hoa most wonderful future, both for tels, three restaurants, two butcher the diocese and province.

The speaker made mention of the home curing meat plant, flour mill, increase in the number of schools printing press, four lumber yards, which had taken place, amounting two halls, besides some forty or to 300 percent, in keeping with the more residences, well equipped ncreased population.

Need of Outlet

After setting forth the exten siveness of the development in the taking up of land by the new settlers, he set forth the dire necessity up for 70 miles west and almost a of the same and the need for imme diate relief which could be no better satisfied than by the building of a coast outlet, of which Prince Rupert would be the logical terminal, being fairly easily acces-Receipts of cattle on western sible and this port being the neartockyards were practically similar est to the Orient. This would open to those of a week ago. Values of up, not only the wealth of the been behind in relieving the distress! and the Portage plains were satur- well finished grain cattle showed north country, but make a speedy of the newcomers. The speaker ated. Grasshoppers are particular- steady but in all other classes a and short means of access to the mentioned through the generosity

UNEMPLOYMENT FIGURES

Editor, Daily News:-

One is almost tempted to believe that the government of Canada is very indifferent towards the unemployment problem, perhaps the most vital of all questions. At least it seems to be persistently evaded. What is, for instance, the official figure of Canada's unemployment? Is it 600,000 as a year ago, or what? The Financial Post estimates the figure at 725,000. A cabinet minister protested, but as he could furnish no actual figure himself, the Post still claims to be right.

No sane minded person will have much confidence in the government's efforts of curing ills, the extent of which it does not attempt to face squarely. Other civilized countries publish the figures weekly or monthly, at least, and it is not unreasonable to believe that these same countries also will be among the first to solve the problem, some steps having been taken already. Why not face the facts and the

responsibilities? JOHN BOSTROM Prince Rupert, June 19, 1932.

THANKS to the foresight of past years, hundreds of thousands of Canadian homes are now protected against present-day privations and future uncertainties. Back of these homes is a vast financial reserve created by savings wisely invested in Life Insurance.

Homes»»

Canadians today own \$6,800,000,000 of Life Insurance. In a period of financial disturbance, these policyholders have proved that Life Insurance lives up to every promise - never depreciates in value - pays every obligation fully and promptly - and constantly safeguards the homes and businesses of the nation.

Frequently, Life Insurance has become the only asset of a family made poor by adverse circumstances, or bereaved by the loss of a breadwinner. Likewise, it has ensured independence for many a man who has been obliged to retire earlier than he had expected.

It is more necessary now than ever to maintain the full protection of your Life Insurance. It is wisdom, too, to add to your investment in Life Insurance so that it will provide ample security for the future of yourself and loved ones.
