RESOLUTION ON SILVER

City Council Agrees to Hold Special Meeting Next Week to Consider Motion of Ald. Casey

The city council agreed last night to hold a special meeting next Monday night to consider a resolution from Ald. Casey urging the federal government to adopt both silver and gold in its monetary system on the basis of natural ratio which is suggested as being 15 to 1. This resolution, already published, was one of the planks in Ald. Casey's election platform in January.

In bringing the matter before the council, Ald. Casey stated that he would have a volume of authorities and arguments to bring before the special meeting on the question of fixed silver and gold ratio. Dr. Mandy, resident mining engineer, had also agreed to come to the meeting to set forth the benefits to be derived from such a policy.

For the purpose of discussion, Ald. Rudderham seconded Ald. Casey's motion.

While he had no objection to the principle, Ald. Collart saw no authority for a special meeting. When a minister of the crown at Ottawa already had the matter before the House of Commons, he did not see where anything that might be done at Prince Rupert would have much weight. The proposal was undoubtedly a good one.

While he did not see where much was to be gained, Ald. Pillsbury had no objection to the proposed special meeting.

After some further discussion, it was agreed to consider the resolution at a special meeting.

POLICY OF LOT SALE

The city council last night laid on the table for two weeks a recommendation from the finance committee that lot 31, block 27, section 1, for which Mr. Fujimoto is offering \$100 be offered to him at the assessed value of \$350. The lot is on Park Avenue.

The whole question of policy in connection with sale by the city of lots reverted for taxes was thrown into discussion when Ald. Collart, chairman of the finance committee, declared that the committee had come to the conclusion that such lots should not be offered for sale at less than assessed value. By continuing to sell lots at lower prices, the city assessment was only jeopardized, Ald. Collart felt. In the past 16 years the city had sold \$22,000 worth of such property and one third of this had come back to the city again.

Ald. Casey took positive disagreement with such a policy as that outlined by Ald. Collart. The city, he felt, was not in the real estate business but was rather a tax collector. It was the duty of the city to get as much tax-bearing property as possible on the list. He felt that the upset price at the annual tax sale—three years' taxes plus charges—should stand good at any time and should be the permanent upset price for all tax sale property. He moved that the matter lay on the table for two weeks.

Ald. Pillsbury agreed with the stand of Ald. Casey and seconded the motion that the report lay on the table until next regular meeting.

Ald. Rudderham was not in agreement with the policy as outlined by Ald. Collart. If this policy were adopted, it would simply mean that sale of reverted lots would be stopped altogether.

Mayor Orme urged that the council lay down some definite line of policy in connection with the matter.

Ald. Linzey was inclined to think that the city should not sell lots under the assessed value.

After some further discussion, Ald. Casey's motion to lay the matter over for two weeks was passed.

WOULD AID RECEPTION

City Council Agrees to Support Move Towards Having Alterations Made on Main Transmission Line

On recommendation of the utilities committee, the city council decided last night to join with the Prince Rupert Radio Association in requesting the Northern British Columbia Power Co., in the interests of better radio reception in the city, to remove secondary wires from the same poles on McBride Street which carry the main transmission line and to change from pin type insulators at present used on the transmission line in the city to the suspension type. The recommendation of the utilities committee followed a recent conference between the committee and a delegation from the Prince Rupert Radio Association when the whole matter of radio reception was thoroughly gone into.

Speaking to the report, Ald. Rudderham stated that government radio inspectors had expressed the opinion that 75% of the trouble with radio reception in the city was due to the nature of the transmission line. If the changes as suggested were made, it was felt that much of the present interference would be removed. It was proposed to send a copy of the request to the radio inspector. Power company officials had promised they would do anything in their power to help reception. Ald. Rudderham moved that the report be adopted.

The adoption of the report was seconded by Ald. Pillsbury.

It was felt that presentation of the request would strengthen the hands of the local management towards having the necessary alterations made.

After brief discussion, adoption of the report was agreed upon.

WILL GIVE ADDRESSES

Dental Hygiene Secretary Coming to the City Tomorrow on Educational Work

Coming north on the steamship Prince George tomorrow will be Dr. Harry S. Thompson, field secretary of the Canadian Dental Hygiene Council, who is on an educational tour sponsored by the insurance companies. Tomorrow and Thursday he will address a number of gatherings. He will speak to school children at the Capitol Theatre and at Booth School auditorium will address the Women's Canadian Club and on Thursday at noon will be the guest at a joint luncheon of the Rotary and Gyro Clubs.

Dr. Thompson will be returning to Vancouver Thursday evening.

MAGISTRATE'S SALARY CUT

Monthly Stipend in Future Will Be \$85 Instead of \$125—Council Requested Reduction

A letter from the deputy provincial secretary advised the council at its meeting last night that an order-in-council had been passed by the government implementing a request from the city that the salary of Police Magistrate McClymont be reduced from \$125 to \$85 per month. Request for a reduction in the magistrate's salary was made by the city council under its general policy of retrenchment.

ANSWER TO TREASURER

City Council Denies Request That Department Staff be Increased

The city council last night adopted a recommendation from the finance committee that the city treasurer be instructed to carry on with his reduced staff and to employ every member of said staff at any work that he might find it necessary to put him to.

The report came as an answer to a recent letter to the city council from City Treasurer D. J. Matheson that it would be impossible for work of his department to be carried on at full efficiency under a recent cut in staff, which had been imposed in the interests of economy.

Ald. Collart, chairman of the finance committee, felt that there were some members of the treasurer's staff who had certain spare time which might well be put to use in other work.

The city council last night finally reconsidered and adopted an amendment to the licence bylaw whereby those in the city who are required to pay a wholesale licence are not also assessed a manufacturing licence.

Stole 500 Chickens But Left His Card

IN A certain suburban district, 500 chickens had disappeared, but no one could find the thief. Then one morning, in the hen-house of E. O. Wagner, a pocket mirror was found. On that mirror was a thumb print.

In the finger print records of a nearby city was found a print that matched it. It said, as plainly as a letter, "The man who stole those chickens is Albert Espene. He lives in Bakersfield. He is father of 11 children, but not straight."

They found the chickens in a hide-

Pocket mirror with tell-tale thumb print

A thumb print sent him looking out, beneath the culprit's ban. He put him behind the bars. He made a mistake of leaving a record with a finger print impressed.

Germ-Laden Prints

This is told to remind you that you leave finger prints on everything you touch. And those finger prints are usually germ laden.

You pick up the germs from things others have touched, from handshakes, from pets, etc. Your touch may convey them to foods—to a piece of toast you butter, to a cookie, to a chocolate. A few of those germs may breed to millions in the mouth. From there they go to attack vital organs.

Life Extension Institute lists 27 diseases which may be conveyed in this way. Colds are the most common, perhaps. Any hand which has been used to check a sneeze or a cough becomes contaminated. And every touch of that hand, in the print it leaves, may spread colds.

How to be Safe

Lifebuoy Soap is used by millions, the world over, to combat these dangers. It contains an antiseptic. Its lather washes away the germs, or makes them inactive.

So, wise people use Lifebuoy often, and always before meals. They teach their children the habit. Thus Life-

buoy, in every country, is being used safely as well as refreshing clean-

to thousands of users.

A Delightful Way

Lifebuoy is a luxurious soap, based on two palm oils. No better soap ever made, no greater lathering. Its lather is gentle and abundant. It has no perfume—but a refreshing safety, which lingers but a moment, tells you it purifies—and protects.

Another safeguard is against odours. Lifebuoy's friendly lathering deep into the pores of your skin, washing them of colour-causing wastes. Lifebuoy for every bath—then washing or during the day, you may wash of no offensive odour from the hands.

If you will prove these facts for yourself, by a simple trial, you will wish to have this luxury soap at home.

Try Lifebuoy Free

If you don't use Lifebuoy soap, to try it, send a clipping from this advertisement with your name and address to Lever Brothers Limited, Dept. 10, Toronto, Ont. One full size cake will be sent you without cost.
