# MILL PLANNED FOR INTERIOR MINE GOLD POSSIBILITIES ON QUEEN CHARLOTTE'S NEGLECTED

## Fiddler Creek Go. Property Is Scene Of Projected New Plant

P. E. Peterson, Veteran Northern Mining Engineer, Announces Plans For Development of Property Which He Has Acquired—To Ship This Year

Enroute to Fiddler Creek near Pacific where he states that he is planning the establishment of a mill upon Joe Tredway's gold property, which he has taken over, P. E. Peterson, well known mining engineer, arrived in the city on the Prince Robert this morning from Vancouver. He will meet other persons who are interested in the project here and expects to proceed to the interior at the first of the week.

## PRINCE AT ZANDVOORT

Members of Former German Royal Family Meet at Home of Former Kaiser

ZANDVOORT, Holland, June 25.—Paying his first visit to Holland in seven years, former Crown Prince Wilhelm of Germany arrived here today from Berlin to join his father, the former Emperor Wilhelm. A conference of members of the former German Royal Family is being held to discuss the political situation in Germany.

## HITLER'S DEMANDS

Leader of Fascist Party Urges Martial Law Throughout Germany In View of Clashes

BERLIN, June 25.—In a public declaration from Nazi headquarters today, Adolf Hitler, leader of the German Fascist party, demanded immediate martial law in all parts of Germany in view of political clashes in various parts of the country which have cost ten lives during the past week.

## Helen Wills Moody And Helen Jacobs Advance in Tennis

WIMBLEDON, England, June 25.—Mrs. Helen Wills Moody of United States advanced Mrs. Kitty Godfrey of England 6-3, 6-0 in the English women's open tennis championship here yesterday.

Helen Jacobs of United States advanced to the quarter final by defeating Mrs. C. H. Jamieson of England 6-1, 6-2.

Fred Perry, English tennis ace today defeated Wilmer Allison of the United States in the fourth round of the men's championships 6-4, 6-1, 4-6, 6-2.

## WEATHER REPORT

Triple Island—Part cloudy, light easterly wind; sea smooth.  
Dead Tree Point—Raining, fresh southeast wind; barometer, 30.08; temperature, 54; heavy swell.

## COL. GRANT MORDEN IS DEAD AT 52

Native of Canada Sat as Member of British House of Commons From 1918 to 1931

WAS FINANCIER  
Promoted Some Important Companies in Eastern Canada including Canada Steamships

LONDON, June 25.—Col. Walter Grant Morden, a native of Prince Edward County, Ontario, and Conservative member of Parliament from 1918 to 1921 for Brentford and Chiswick, died today at the age of 52.

In Canada Lieut. Col. W. Grant Morden, prior to his departure to reside in London permanently, achieved a reputation as an aggressive financier on the Montreal Street. He was a bold operator on the stock market. After representing Canadian firms in London he returned to Canada to promote the Canada Steamship Lines and later the British Empire Steel Corporation. Canada Steamship Lines were formed of a number of lake transportation and allied interests, both freight and passenger, and shipbuilding and coal companies. The more important concerns taken in were:

The Richelieu and Ontario Navigation Company, Quebec Steamships Company, Niagara Navigation Company Limited, Northern Navigation Company, Thousand Island Steamboat Company, Chicago Steam Navigation Company Limited, Century Coal Company and Davie Shipbuilding and Repairing. (Continued on Page 5)

## CROPS ARE DOING WELL

Grains Making Rapid Growth and Early Harvest is Being Predicted

NO DAMAGE  
Weather in Alberta Good For Growing—Peace River Wants Rain

WINNIPEG, June 25.—Crop conditions throughout the entire prairie provinces continue generally good, according to the weekly report of the agricultural department, Canadian National Railways. Grains are making rapid growth and an early harvest is predicted. No extensive damage from any source is reported. The anti-hopper campaign is being vigorously pressed, where necessary, and a strongly optimistic feeling prevails.

In Manitoba favorable weather has prevailed and some districts report fifty percent wheat now in shot blade. In the Gladstone subdivision heads and straw are short and future weather conditions will determine the quality of the wheat. In the Dauphin-Swan River district, weather has been cool with heavy showers and adequate moisture is reported at all points. Hay prospects are good and that crop promises to be above normal.

In the Regina division of Saskatchewan weather has been generally warm with local showers. All crops are reported ahead of last year and making rapid headway. Cutworm damage has not been extensive although some gardens have suffered. (Continued on Page 5)

## President von Hindenburg

Beer and schnapps may be fine for the crowd, but there's nothing like a good cuppa coffee to perk one up, says President Von Hindenburg as he forgets the cares of state at Berlin's race track

## CAPITALISTIC SYSTEM HAS OUTLIVED ITS USEFULNESS, LABOR MEMBER SAYS HERE

Angus MacInnis M.P. of South Vancouver Believes Time Has Come For Working People to Distribute Product of Their Toil

Declaring that the present capitalistic system had outlived its usefulness and that the working people who had learned the lessons of production were also competent to handle the distribution of the product of their toil and thus terminate a situation such as now existed whereby plenty existed yet hundreds of thousands were without the necessities of life, Angus MacInnis, Labor Member of Parliament for South Vancouver, before a good-sized audience in the Moose Hall last night, reviewed in an interesting manner economic conditions of the day and disclosed some of the policies of the Labor party for dealing with same. Mr. MacInnis provided himself a pleasant and convincing speaker and his remarks were listened to with attention and interest by all. At the close of his address a number of questions were asked from the audience and answered by Mr. MacInnis.

The meeting was presided over by Ald. S. D. Macdonald, president of the Prince Rupert Trades and Labor Council, and was also addressed briefly by T. J. Shenton, Labor candidate for Atlin in the forthcoming provincial election. Others on the platform were Ald. G. W. Rudderham and Ald. James Black, Labor members of the city council. Before the opening of the meeting, there were orchestral selections by Mrs. J. S. Black and Frank Kenny. The proceedings started with the singing of "O Canada" and closed with "God Save the King."

Not Much Accomplished  
Opening his address by referring to the accomplishments of Parliament since he had become a member two years ago, Mr. MacInnis declared that, unfortunately, he could not say very much had been accomplished. Although the House had sat in its recent session for four months, it was doubtful if anything had been done to tend to improve the situation which this country, like the rest of the world, was facing. In spite of the assurances of Premier Bennett during the election campaign that, if elected to power, he would stem the tide of unemployment. (Continued on page 6.)

## ESQUIMALT FOR BEER

Significant Test of Public Opinion on Repeal Taken in Island Riding

VICTORIA, June 25.—Esquimalt will continue to have beer parlors. The electors on Friday voted 1152 against repeal of beer sale and 539 for repeal.

This was considered the most important test of public opinion on beer since the general plebiscite in 1924. Esquimalt was the first wet riding to vote on repeal of beer sale.

In 1924, when the riding first went wet, the vote was 665 for and 550 against beer sale.

## Three Promising Mines On Islands Should Now Be Under Development

Dr. J. T. Mandy, Resident Mining Engineer, Says Less Meritorious Properties Elsewhere Are Being Successfully Operated—Is Fine Field For Intensive Prospecting

"There are at least three lode gold properties on the Queen Charlotte Islands that appear to warrant operation and which should certainly be under development at the present time," declares Dr. Joseph T. Mandy, resident mining engineer for northwestern mineral survey district following his return to Prince Rupert after spending a few weeks on the Islands on inspectional duties. "These properties have better promise of success than some which are now under active operation in more remote areas of the province."

In at least two of the properties referred to, Dr. Mandy states, lode gold occurs in the free state in quartz. All three properties are close to tidewater and transportation presents no difficulties. Further the method of treatment and character of ore would be such that it would be possible to get back immediately a substantial part if not all of the costs of development.

Dr. Mandy is unable to account for these and other properties on the Islands having not been long since in active operation unless it is due to the tendency which seems general to sidetrack the Queen Charlotte Islands.

Field For Prospecting  
There are extensive and promising areas on the Queen Charlottes which have not as yet been even prospected. The country requires intensive and methodical prospecting whereas it has received in the past only the most superficial sort of exploration. Due to the heavy underbrush, some difficulty is presented so far as prospecting is concerned. The most effective means of prospecting seems to be to take to the creeks and streams and follow pan indications into the outcrops on the hills.

One of the most promising known belts lies on Moresby Island between Inskip Channel and Kootenay Harbor on the west coast. Some sections on the west coast of Graham Island have equally interesting geology, particularly in the vicinity of Vancouver Harbor and Rensel Sound and the northwestern segment of Granam Island west of Massett Inlet.

In addition to gold, the Queen Charlotte Islands also possess good base metal possibilities, particularly in copper, but there will probably be little interest taken in this until an improvement comes in the metal markets situation.

There are also non-metallic possibilities. There are sections on the Queen Charlotte Islands of cretaceous formations containing material which should be useful as building sandstone, grindstones and whetstones. The Islands also possess a wide variety of semi-precious stones such as agates, etc. which some day may be used in the manufacture of jewelry, curios, souvenirs, etc.

During his visit to the Queen Charlotte Islands, Dr. Mandy made an inspection of the famous South-easter mine at Skidegate which is now under development by the Kit-sault-Eagle Gold Mines Ltd. The clarity of this property has now been established and development (Continued on page 6.)

## DESTROYERS HERE TODAY

Frim United States Naval Vessels Arrive For Two-Day Visit in Port—Moored at R. C. N. V. R. Headquarters

In the course of a training cruise to Alaska waters with members of the United States Navy reserve officers training corps from the University of California and the University of Washington on board, the United States Navy destroyers Crowninshield and Trever from San Diego arrived in port at 1 o'clock this afternoon for a two-day visit which will terminate early Monday morning. The two trim little vessels, each carrying 122 men or more, moored at the Canadian National wharves alongside local headquarters of the Royal Canadian Naval Volunteer Reserve.

The Crowninshield is carrying the reserve officers from the University of California while the Trever has those from University of Washington.

## Local Pastor on Trip to Montreal

Rev. and Mrs. W. D. Grant Hollingworth to Leave For East on Monday's Train

Rev. W. D. Grant Hollingworth, pastor of First Presbyterian Church, and Mrs. Hollingworth will leave on Monday's train for a two months' vacation trip to their homes in Montreal. Enroute east they will pay a brief visit at Calgary where they resided before coming here.

During the month of July Rev. Dr. R. J. Douglas of New Westminster, synodical superintendent for British Columbia, arriving here from the south on the Prince Robert Saturday morning next, will supply in the local pulpit. Rev. Dr. H. R. Grant of Fort William, former pastor of the church, will be here for the August services.

## Halibut Landings
