## Vanderhoof Optimistic In **Regard to Mining Industry**

## (By C. M. Irvine)

BURNS LAKE, June 28:-Lack of rain in the interior around the vicinity of Burns Lake and Vanderhoof is causing great harm to the crops this year. The soil is very dry and even the garden plants are being spoiled by lack of moisture.

There are a great many forest fires this year and seemingly, very little effort is being"

made to stop them. Along some of the roads that once were pretty drives can now be seen only large **FLECTIONS** stretches of blackened timber.

The tourist season is just starting now at Burns Lake. Many cars of tourists, both from Eastern Canada Joseph Jean Retains Maisonneuve and the United States, pass through here during the summer. Some stop only for repairs while others sper.d the night.

One of the popular drives taken out of Burns Lake is to Francois and Ootsa Lakes where beautiful scenery, combined with a good fishing and hunting country, makes a great place for the people of the east and States to visit.
