PRINCE RUPERT, B.C.

### Someone Asked the Other Day

why the Daily News had such a large circulation in the city. It was easy to answer. The reason is because those responsible for the production of the paper put the very best they can afford into its make-up and sometimes more than they can afford. They give the people the best possible for the money.

ONLY ONLY  
**10c. a Week**  
that is the price of  
**The Daily News**  
Delivered to Your Home

It's worth ten cents a week to get the Waterfront Whiffs on Saturday. It's worth something to have the topics of the day discussed in an impartial and interesting manner. It's worth something to follow the adventures of Tillie the Toiler every evening. It's worth a good deal to be able to read the local advertising and to know where to buy and what price to pay.

The Daily News is a paper that is representative of the city and no one need be ashamed to send it away to their friends.

Telephone the office and the boy will call and collect.

### Moose Legion Annual Dance

Two Hundred Persons Present at Enjoyable Affair in Moose Hall Last Night

The annual dance of the local Moose Legion was held last night in the Moose Hall and proved to be a very enjoyable affair. The hall was appropriately decorated for the occasion and there were about two hundred dancers present. From 9 p.m. until 2 a.m. a splendid program of dance music was dispensed by Bob Greenfield and his Premier Orchestra.

At midnight delicious buffet refreshments were served.

B. J. Bacon was as usual a general master of ceremonies. Ole Stegavig presided at the door and the committee in charge of the affair consisted of: Ted Norvik, Joe Ratchford, Fred Harv, Fred Scadlen and Gillis Royer.

A. J. Matheson, who has been on a brief trip to Kalien, returned to the city on this morning's train.

### The Flavor of Your Cooking is Wonderfully Improved

MAY we show you how to put new flavor in your old favorite dishes? This little book "New Magic in the Kitchen" is filled with recipes for the most delightful things to eat—puddings, cakes, salads, ice cream—180 tested recipes in all.

#### Try this recipe for Cream Rice Pudding

1/2 cup rice 1/2 cup Eagle Brand  
2 1/2 cups water 2 eggs  
1 teaspoon salt 1/2 cup raisins

Wash rice thoroughly and cook in double boiler with water and salt until rice is tender and the water absorbed. Add condensed milk, beaten eggs and raisins, and continue cooking for fifteen minutes. Serve hot or cold.

Clip this coupon today. Your copy of "New Magic" will be mailed absolutely free.

### NEWS OF THE MINES AROUND PRINCE RUPERT

#### Steady Development of Lorne Creek Placer Workings—Hahti to Operate Silverado—Georgia River to Resume Work Soon

Steady progress is being made with development work in connection with placer workings on Lorne Creek near Pacific in the interior. F. Neville, who is in charge of the work, has ordered material for bunkhouses and construction will start as soon as the material arrives. When the bunkhouses are completed, the present crew of five will be added to and the work speeded up. The equipment to be installed will operate at high pressure. Water will be supplied by pumps and a large yardage will be handled daily. It is understood that a grant of \$700 has been obtained from the government to recondition the road from Dorreen to the workings and Mr. Neville will add another \$300. Besides repairing the road, a bridge will be put across Lorne Creek.

Dan Hume, who returned to Stewart last week after a visit to Vancouver and Seattle, stated that, while in the south, he had seen Wellington Beaton, president of the Georgia River Gold Mines Ltd., and that the latter had stated that arrangements were under way for the resumption of development work on the company's well known property a few miles below Stewart on Portland Canal early in the spring.

John Hahti has secured a working lease on the Silverado property at Stewart from the Premier Gold Mining Co. Ltd. and started work last week on the property with a picked crew of miners who are associated with him in the venture. The first load of supplies being taken up to the camp by Owen Mc Fadden recently. Mr. Hahti and three of his associates as a preliminary crew are now engaged in getting things ready for actual operations which it is expected will commence in a very short time with an increase in the size of the crew as conditions warrant. In speaking of the undertaking, Mr. Hahti stated that the depreciation of the Canadian dollar made the operation possible and that he expected to be able to ship a sufficient tonnage of high grade silver-lead ore containing also a small gold content to Selby sufficient to make good wages for all employed.

The discovery of Dr. W. H. Martin of the Biological Board of Canada that the loss by fishermen at the mouth of the Naas River of gill nets was due to the action of jellyfish and similar organisms which bind the nets, discounts the theory that was held by some of the fishermen prior to the investigation that the trouble might be due to discharge of milled rock from the Granby Co.'s concentrator at Anyox.

Exclusive of allowance for depreciation, depletion and federal taxes, the operations of the Granby Consolidated Mining, Smelting and Power Co. Ltd. for the quarter ending September 30, 1931, showed a loss of \$5,696. Income from other sources for the quarter amounted to \$57,879. For the nine months ending September 30 last, operating income amounted to \$69,349 and other income \$160,317 or a total of 229,666. Dividends have been reduced to an annual rate of 50c. per share by the declaration of a dividend of 12c. per share payable February 1, 1932, to shareholders on record of January 15, 1932. The February and May quarterly disbursements were on the basis of \$2 per share annually, while, with the disbursement on August 1, the rate was reduced to \$1 per share. The dividend just declared brings the annual rate to 50c. per share. While the disbursement is referred to as a dividend, in reality the company has paid no dividends since 1919. In 1927 payments were initiated to shareholders as a return of capital from reserve fund for depletion and depreciation. In 1927 \$1 per share was paid. In 1928 it was increased to \$3 per share and in 1929 \$7 per share was paid while last year \$5.25 per share was distributed and this, with the payment just announced, brings the total capital return to \$17.62 per share.

While, under the curtailment program to which copper producers of Canada have subscribed owing to the less price of the metal, Granby Co. shipments of refined copper will be curtailed to 26 1/2 per

these the sluice is 12 by 12 inches lined with lagging. It is found, however, that the lagging wears rapidly and it is being replaced by blocks. Much of the gold in these gravels is quite coarse and practically all of this is collected in the riffle boxes. However, as some flake and fine gold can be seen on the lagging, it will be found that a greater saving of this will be made by the blocks being installed. Drifting is carried about four feet into bedrock and from two to three feet of gravel is also taken. The total thickness between bedrock and the lava is 12 to 16 feet, where the bedrock is soft more than it is hard. Pay is usually best where there is a thin layer of clay in the gravel just above bedrock and this is used as a guide by Tornquist. Pay will average about \$3 to \$6 to the car (about one-half cubic yard) with gold estimated at \$15.85 per ounce. In the operation it is estimated that one man will produce about 12 cars per day. Work is being carried on by two mining men and one man-tramming, giving an estimated production at this capacity and grade of about 144 cars, yielding from \$332 to \$664 a week. Clean-ups are made about every two weeks. For the two weeks previous to June 27, 1931, a clean-up of 54 ounces was recovered while in another two weeks 104 1/2 ounces of course gold was recovered as well as an appreciable quantity of fine gold in the black sand. In the latter clean-up the heaviest nugget weighed 3 ounces 10 dwt.

The natives are taking up the radio telephone. This morning, Peter M. Wells of Port Simpson, who is visiting in the city, was in conversation with James Laml, manager of the Cassiar Cannery, at the head office of the Cassiar Packing Company in Vancouver, discussing the fishing situation.
