Some Babies owe it

THAT'S what grateful mothers often write us, praising Carnation Milk for baby feeding. Famous specialists recommend it because of its purity, uniformity and safety. Carnation is heat-treated forming finest, softest curds in the baby's stomach. And homogenization breaks up the coarse fat globules into easily assimilable ones. This makes Carnation super-smooth in cookery, too. Splendid when creaming coffee and for use with fruits and cereals. Economical because double-rich.

WE RECOMMEND THESE PURCHASES

In this issue you will find a number of advertisements of real interest to you.

They offer for sale a variety of products that are often enough vital necessities. Sooner or later you will have to buy many of them anyway. You will undoubtedly buy some of those we advertise.

WHY?

We recommend these heartily because we know from long experience that when a product bears the name of its maker and finds a friendy market throughout the country it must have survived the most exacting tests as to quality, desirability and Value.

In this day when a manufacturer or merchant reaches the point where he is willing to offer his wares for sale through the advertising columns of the press, you can depend upon it that it must be worth purchasing . . . because otherwise the business wouldn't last long!
