DESPICABLE HOAX

It was a despicable act of John Hughes Curtis, Norfolk shipbuilder, to play upon the sympathies of a man who had lost his child as is reported to have been done in the case of Colonel Lindbergh. How much more of the search story may prove to be fiction remains yet to be told.

QUARREL IN INDIA

The fighting in Bombay, India, between Moslems and Hindus is one of the periodic quarrels that develop between people of two hostile religions where bigotry and fanaticism prevail. It indicates one of the difficulties of governing the country and shows how impossible it would be to leave the people to their own resources as they were before British intervention.

MUST CULTIVATE GARDENS

The relief department of the city of Edmonton is insisting that every married man receiving relief must cultivate a garden this year. Those who have gardens of their own are expected to get them under cultivation and those who have no garden are given one by the city to cultivate.

The compulsory order is all right for the city of Edmonton where it is easy to cultivate a vacant lot. In Prince Rupert the case is rather different. A vacant lot is usually covered with stumps and roots or is swampy and unfit for cultivation without extensive and expensive draining.

HEADACHES caused by ACID

ACIDITY haunts its victim like a shadow. No appetite; what you do eat disagrees, causes flatulence and makes you sluggish. Work is an effort. Before night, a headache.

Do you know what is wrong? An acid-soaked system! Too many acid foods. But you need not diet your way out of this difficulty! Take a tablespoonful or two of Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia has a gentle, laxative action. It is ever so much better for one than the harsh purgatives that upset the stomach or weaken the bowel muscles. An occasional dose of Phillips' Milk of Magnesia is all that is necessary to avoid those periodical attacks of sluggishness so apt to occur with any person who does not get a great deal of physical exercise.

From the hour you relieve that acid condition you will feel like another person. Every spoonful of Phillips' Milk of Magnesia will neutralize many times as much acid. Take it when stomach nerves are over-stimulated through worry, or excitement, when everything ferments in your stomach, and waste matter is poisoning the bloodstream or whenever the bowels are clogged.

New Zealand Treaty Under Discussion—B. C. Tories Opposed to Lower Freight Rates—Relief Work to Be Curtailed

Friday, April 29—Practically the whole of the day was taken up in discussing the New Zealand treaty and considerable interest was shown in this throughout the day. Hon. H. H. Stevens, minister of trade and commerce, who piloted the treaty through, was kept busy explaining to the House every phase of the treaty.

It was somewhat amusing to listen to the accusations of the Liberal members who seized the opportunity to remind the members of the government side that each and every one of them had in July 1930 promised better prices to the farmer and more protection in the matter of butter and, now, here they were silent as the treaty was going through the House—the duty on butter being reduced from 8c. to 5c.

The question of wool entering Canada free from New Zealand also came in for a great deal of

criticism, especially as the government only about two weeks previous had voted in the House for a duty on all wool entering Canada. Even one of the Conservative members could not refrain from rising and chiding the Minister and his fellow members for not being altogether honest during the last election in the matter of promises regarding the entry of butter to this country. To me, it seems there is very little to be gained by prolonged discussions after the treaty has been signed by both

countries, and it was evident that the members on the government side were very glad when the discussions ended and the treaty passed the house.

Time will prove the wisdom or otherwise of this treaty. I am not unmindful, however, that both New Zealand and Australia at present have their currencies at a discount rate considerably below ours on the world market which allows them quite a latitude in the markets of the world, they being in a position to accept less money, which means more to them in their coin than it does to us. However, it is well to remember that we must buy as well as sell. No nation can have it all one way. Trade to my mind is the life-stream of our country.

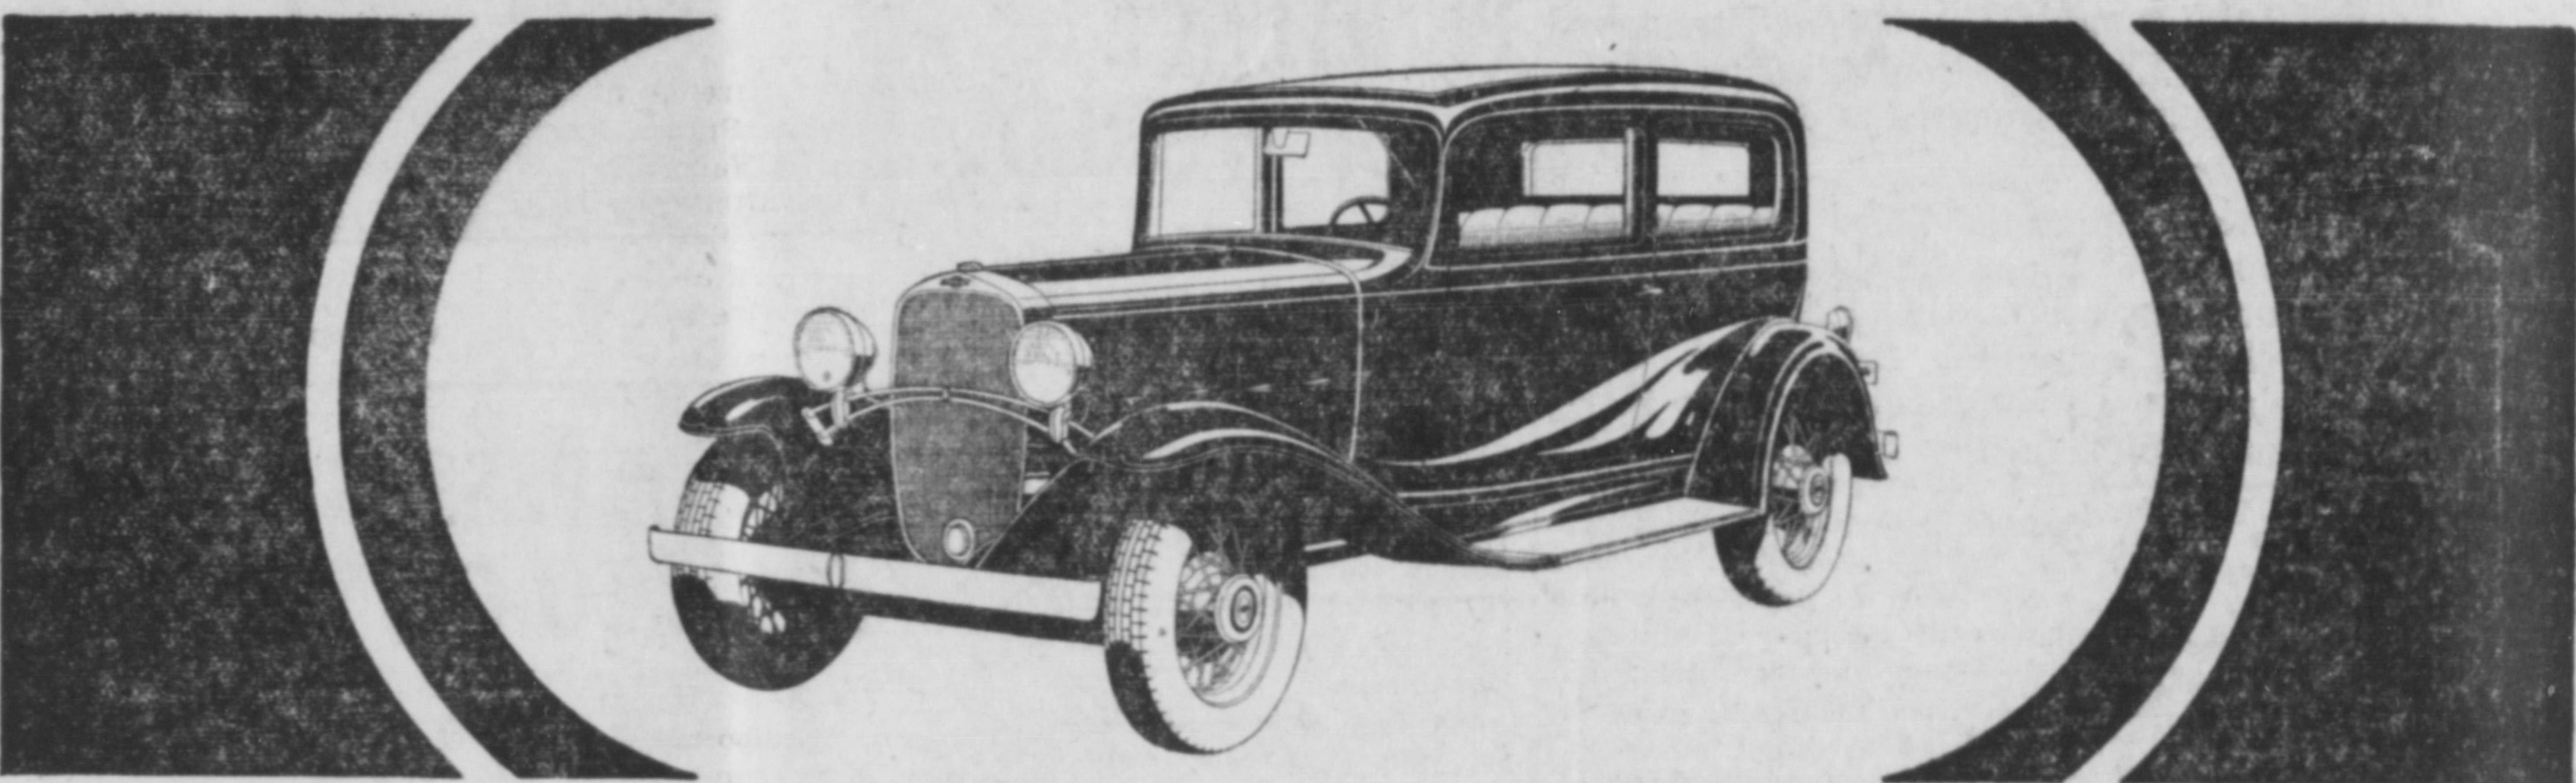

Monday, May 2—It is rather interesting to watch the parade of the Speaker leave his quarters and proceed to the House. The procession is headed by the chief constable and his two deputies; then comes the sergeant-at-arms carrying the mace on his shoulder, following him is the Speaker with the chief clerk at his side and, following the Speaker, is the clerk, the assistant clerk and two pages. Everyone must stand to one side as the procession marches along the main galleries and enters the

House of Commons a few minutes before three o'clock. The mace is laid on the table as the Speaker takes his seat after which alarm bells are set ringing for the space of three or four minutes calling the members to prayers. Monday has usually a sparse attendance of members.

The second reading of the Companies' Act amendment was moved by the Hon. C. H. Cahon, Secretary of State, the purpose of the bill being to avoid a certain amount of confusion regarding stock companies as between the provincial and dominion governments. It was interesting to learn that certain companies, who are refused charters to conduct business in regard to insurance and stock of various kinds, could go to the province and in many instances receive charters. Cases were cited where companies, who were refused charters both by the provinces and dominion, went to London and obtained a charter there, coming back to Canada and operating as a company, all of which is not very good for the welfare of the nation. The Premier said that he hoped sometime to appoint a federal board, that is if he could get the provinces to agree, and this board would have the final say or supervision of such companies be-

fore commencing business. One of the greatest difficulties, however, is that some of the provinces will not give up certain rights and privileges which they have enjoyed. (Continued on page 8.)
